

AMP The Alliance for Malaria Prevention

Expanding the ownership and use of mosquito nets

AMP Conference call minutes: www.allianceformalariaprevention.com

29th April 2015

Dial-in number: +1-213-787-0529
USA toll-free: 888-808-6929
Access Code: 3904916

If you wish to be added to or taken off of this mailing list please contact: melanie.caruso@ifrc.org

Do you have a topic / issue / country specific update to share with the AMP partnership? Send a summary of the topic you would like to discuss to: jason.peat@ifrc.org or melanie.caruso@ifrc.org and we will schedule your update at the start of an upcoming AMP conference call.

Agenda – April 29th AMP conference call:

Chair: Jason Peat
Rapporteur: Melanie Caruso

- Introductions
- Review and approval of minutes from last week's AMP conference call
- Angola update
- Liberia update
- Malawi update
- Country updates
- Working group updates
- AoB

Next conference call: Wednesday, 6th May 2015 10:00 EDT, 14:00 GMT / UTC, 16:00 CET

Participants:

AMP participants:	Melanie Caruso, Dorothy Onyango, Greg Pirio, Yves Cyaka
BASF:	Alex Heimsch
Bayer Environmental Science:	
Bestnet:	
Buy a Net:	
CDC / PMI:	
CRS:	Suzanne van Hulle
Disease Control Technologies:	
E3Resources:	
Global Health Partners:	
IFRC:	
Independent participants:	
Intelligent Insect Control:	
IPHA:	Jessica Rockwood
JC Flowers Foundation:	Danielle Givens
JHU Centre for Communications:	
MCDI:	

For additional information:

and allianceformalariaprevention@gmail.com

Nets for Life: Sam Asiedu
 PLAN Canada:
 PSI:
 Rotarians Action Group on Malaria:
 RTI:
 Tana Netting:
 Tony Blair Faith Foundation
 UNICEF:
 UN Foundation: Elizabeth Ivanovich
 USAID / PMI:
 VF: Naomi Bohn
 WHO: Sylvester Maleghemi, Stefan Hoyer
 World Vision: Gagik Karapetyan

General updates:

- None

AMP working group updates:

Country support working group:

Chair: Marcy Erskine IFRC – marcy.erskine@ifrc.org

Current AMP TA missions:

Country	Type of technical support requested from AMP	Partner / Funding source	Mission dates
Liberia	Implementation	AMP OGAC / VectorWorks	February – May 2015
	Logistics	AMP OGAC	March-May 2015
Nigeria	Pilot CMA	AMP OGAC	April-May 2015
Angola	Communications	AMP OGAC	13 th April – 2 nd May 2015

Planned AMP TA missions 2015:

Country	Type of technical support requested from AMP	Partner / Funding source	Mission dates
Madagascar	Logistics training	AMP	TBC
Malawi	Implementation Remote support	AMP	TBD Ongoing
Pakistan	Remote support	AMP	N/A
Sudan	Remote support on M&E BCC/Communications	AMP AMP	Ongoing TBC

Completed AMP TA support (distance and in-country) in 2015:

Country	Type of technical support requested	Partner / Funding	Mission dates
---------	-------------------------------------	-------------------	---------------

	from AMP	source	
Angola	1 x Communications Distance support	AMP OGAC	February/March 2015
Cameroun	3 x Microplanning	AMP OGAC	March - April 2015
Ghana	Communications	Distance support	April 2015
Malawi	Implementation Remote support	AMP OGAC	February 2015 March-May 2015
Nigeria	2 x Commodity Management Assessment	AMP OGAC	March 2015
Sudan	M&E (LLIN tracking system)	AMP OGAC + Distance support from MORE	March – April 2015
Total # of countries supported by AMP in 2015 (distance and in-country) :		6	

Emerging issues working group:

Co-chairs: Megan Fotheringham – USAID/PMI mfotheringham@usaid.gov

- Minutes of this week's EIWG call attached to this week's AMP weekly call minutes
- EIWG initiated its first discussion about ITN Distribution Accountability. The group defined the issue/problem and also started thinking about ways that AMP could address it.
- The next call is on May 7, 2015 at 10 am EDT/14:00 GMT/16:00 CET where the group will continue this discussion thread and move it forward.
- A second discussion on ITN preferences and how/whether that influences use will be held later in the month of May. Stay tuned for a meeting announcement about that discussion

Monitoring, Operational Research, and Evaluation (MORE) working group:

Co-chairs: (David Gittelman - CDC/PMI dmg1@cdc.gov and Elizabeth Ivanovich UNF - eivanovich@unfoundation.org ; Mame Birame – USAID/PMI Senegal mbdiouf@usaid.gov; and Sylvester Maleghemi – WHO, Nigeria tojumaleghemi@yahoo.co.uk)

- The MORE group held a call yesterday and a presentation was given on the work AMP has been supporting in South Sudan: Developing a tracking system of LLIN ownership, usage and durability in Sudan – (Update from AMP consultant Jenny Cervinkas' recent mission to Sudan)
- The minutes of this call will be shared soon
- The next MORE call will take place in May – announcement will be circulated

Net mapping project working group:

Chair: John Milliner – Milliner Global Associates jemilliner@gmail.com

- Q1 report is complete

Below is a web link to the IR Mapper. This is the group that the Net Mapping Project is working with to develop LLIN distribution maps. The LLIN maps are not ready yet, but this link takes you to the IR Mapper website that presents the current situation with regard to insecticide resistance. It is continually being updated and is a valuable asset in understanding what resistance is and where it is occurring. Information on the website can be accessed either through published resistance articles or through interactive maps.

www.irmapper.com

Toolkit working group:

Co-chairs: Hannah Koenker – JHU hkoenker@jhuccp.org ; Jessica Rockwood – IPHA jessicarockwood@verizon.net; Marcy Erskine IFRC – marcy.erskine@ifrc.org

- Project of toolkit revision on hold until Q3 2015

AMP 'ACTIVE COUNTRIES'

Countries where AMP is currently providing technical assistance via in-country missions or distance support.

AMP 'Active Countries' updates provided on April 29th AMP call: Angola, CAR, Liberia, Malawi, Nigeria

Angola:

Population at risk of malaria in Angola :		19,600,000 (World Malaria Report, 2012)					
Required LLINs :		10,888,888					
LLINs imported into the country three years prior to update :		4,850,646 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	Phased approach by province – 1LLIN/2 people - 2013	11,700,000	7,484,312	3,669,125		Implementation , Logistics	03.04.13
ANC							
EPI							
Totals	N/A	11,700,000	7,484,312	3,669,125			N/A

Update on April 29th AMP conference call:

- AMP TA provider is in country assisting the NMCP on their communications strategy
- Working with the NMCP's communication team drafted four work plans and timelines for the completion of four BCC interventions to be completed by the end of June 2015. The four interventions are:
 1. Production and broadcast of radio and TV spots;
 2. Provincial-level orientation meetings with religious and traditional leaders;
 3. Contest for the best Radio and TV program motivating net use and proper care;
 4. The mass delivery of universal SMS Messages to mobile phone users encouraging net use;
- These interventions will target the five provinces -- Bengo, Cabinda, Lunda Sul, Lunda Norte and Namibe -- that benefited from the Global Fund-financed mass distribution of LLINs.

Cameroun:

Population at risk of malaria in Cameroun :		22,250,000 (World Malaria Report, 2014)					
Required LLINs :		12,361,111					
LLINs imported into the country three years prior to update :		1,537,744 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass	UC March	12,	12,	0		Implementatio	24.03.201

distributio n	2015	322,059	322,059 (GF)			n and Logistics	5
ANC							
EPI							
Totals		12, 322,059	12, 322,059	0			

Ongoing issues:

- Planning a nationwide universal coverage LLIN distribution campaign of 12,322,059 LLINs in 2015 for an estimated 22,179,707 population in 10 regions, 189 districts, and 1749 Health Service areas.
- The Global Fund is financing the purchase and distribution costs for 9 regions and the Cameroon government the LLIN purchase and distribution costs for the Central region (Yaoundé).
- The 2015 campaign is planned in 3 phases with staggered arrival of LLINs in country, direct delivery to the capitals of the administrative regions, and planned consequent distributions in the regions
- AMP is recommending a delay in distribution because of late arrival of LLINs to port in Douala
- Distribution in 2 regions have planned in June, and then other 6 regions from October to December
- End of June distribution may not be realisable because of delays and communication campaign has yet to start with pre-testing of radio and media material
- Another challenge to current timelines are the amount of trainings to be done in such a short amount of time. Training of HH registration means 29 training session over a 5 day period – organisational challenge to get money out in time for these to be implemented.
- Also challenging is the short period of time allocated for positioning of nets from arrival in port of Douala to distribution point. Although transport companies may say they can do it, it is thought it will take a couple more weeks
- Final mission report should be circulated next week after approval
- NMCP is looking at AMP to provide TA after phase 1 of the campaign as country is preoccupied with problems of traceability following the 2011 campaign. Probably sometime end of July/early August for a lessons learned evaluation session and commodity management audit.

Central African Republic (C.A.R.):

Population at risk of malaria in CAR :		<i>4,490,000 (World Malaria Report, 2012)</i>					
Required LLINs :		<i>2,494,445</i>					
LLINs imported into the country three years prior to update :		<i>162,870 (AMP Net Mapping Project)</i>					
Distributio n channel	Scale of distributio n	# LLINs needed per distributio n channel	# LLINs available per distributio n channel	LLIN gap per distributio n channel	Budget gap per distributio n channel	Technical assistance requested with date per distributio n channel	Date of most recent update
Mass distribution	2014 phase 2 rolling distribution according to security situation	2.2 million	2.2 million GF R8 phase 2	0		Micro planning	30.04.2014
ANC							
EPI							
Totals	N/A	2.2 million	2.2 million	0			N/A

Update on April 29th AMP conference call:

- Distribution started in RS almost complete and currently prepositioning nets in RS3 – that will complete the national distribution as security situation does not allow access to all RS in the country
- We will run out of GF nets before the entire pop of car is covered – by end of June, all GF funded nets will be distributed, then we will have an understabign of the areas that were not covered
- LLIN coverage and usage survey should start in Bangui in May, and then in RS2 and 3 after that.

Ongoing issues:

- 30% of nets have been distributed in RS2
- Finalising micro planning for RS3
- Transport will start in 2 weeks for RS3
- RS4, 5 and 6 will distribute nets at localised sites at different locations through groups such as MENTOR and MSF

Liberia:

Population at risk of malaria in Liberia :				4,130,000 (World Malaria Report, 2012)			
Required LLINs :				2,294,444			
LLINs imported into the country three years prior to update :				2,896,136 (AMP Net Mapping Project)			
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	Planned country wide mass distribution (last quarter of 2014)	2,195,796	1,159,089 GF 289,280 surplus from routine LLINs	169,726		Logistics and Implementation TA	09.10.13
ANC			577,700 USAID-PMI				
EPI							
Totals	N/A	2,195,796	2,026,069	169,726			N/A

Update on April 29th AMP conference call:

- 2 AMP TA providers are currently in Liberia providing support in the lead up to the campaign
- The latest Ebola sitrep shows zero new cases. On 8th of May, 42 days will have elapsed since the last confirmed case.
- The campaign was launched on 25th April and distribution has commenced.
- Distribution taking place in Congo Town, Clara town, New Kru Town, Westpoint in Monrovia, Salala District in Bong County and one other in Mamba-Ka District in Margibi County is distributing. The reason for not starting distribution in all counties was the lack of data collection and logs tracking tools in the field.
- All trainings have been completed in Childfund areas
- Completed training in Grand Gedeh. Trainings in Grand Kru, River Cess, and Sinoe Counties to start on 28th April while trainings in Maryland County are ongoing. Training should be complete in the region on Thursday.
- Printing of logistics and data collection tools is taking place but lagging behind. They are printing night and day.
- Reports of bridges getting destroyed and the South East slowly becoming inaccessible is a major concern. It rains heavily in the SE and has already started raining in Monrovia.

- On 23rd April the TAs went to visit 3 rural Districts to monitor the movement of nets. In all 3 districts warehouses visited, nets are stored in safe warehouses. The movement of nets to these districts was made through WFP system and in one of the districts; we were shown the WFP waybills that were used. The concerns noted by the TAS were incomplete filling of the WFP waybills on delivery and the lack of program waybills and stock cards. The tracking tools are currently being printed and it is hoped that they will be made available to the SRs before the start the next level of net movement.
- Nets movement from counties to the districts.
- Launch was combined with World Malaria Day on 25th April. The campaign was launched by the Minister for Foreign Affairs and witnessed by various national and global dignitaries.

Malawi:

Population at risk of malaria in Malawi :		15,400,000 (World Malaria Report, 2012)					
Required LLINs :		8,555,556					
LLINs imported into the country three years prior to update :		9,040,385 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	Need to fill remaining gap from 2012 mass distribution	800,000					10.04.13
ANC							
EPI							
Totals	N/A	800,000					N/A

Update on April 29th AMP conference call:

- Most recently, in December 2014, **1,158,968** LLINs were distributed in the first phase of the current national campaign. Six districts (Nkhotakhota, Mchinji, Likoma, Mwanza, Neno, and Phalombe) were targeted in this mini-campaign based on the time elapsed since they were covered under previous campaigns.
- The second phase of the national campaign includes the coverage of four districts by Concern Universal with support from the Against Malaria Foundation. In September-October 2014, Dedza district received 245,489 nets out the 280,057 required to achieve universal coverage. The procurement of remaining nets is ongoing and a mop-up distribution will take place in the coming months. Dowa district is now in the process of registration, verification and data entry phase and the distribution is expected to start in March 2015. For Balaka and Ntcheu districts, distribution is scheduled for mid-2015 (June/August) to reconcile with the main campaign phase.
- The main campaign will be carried out in all districts not covered during the mini-campaign or under Concern districts. Therefore the main campaign will cover a total of 19 districts using the phased approach by zone. For the purpose of this approach, three zones have been identified based on regional demarcation. Due to different weather patterns, the actual distribution exercise will be conducted in three months starting with the southern zone, then central and finally the Northern zone.
- AMP is providing ongoing distance support to the campaign planning
- An implementation strategy for the main campaign was developed and submitted to GF in March 2015:

- 19 districts will be covered in 3 phases: zone 1 (south zone), zone 2 (Central zone) and zone 3: North zone);
- Sleeping spaces will be used to determine the number of nets the household is expected to receive during the main campaign.
- A road map for the main campaign was developed and submitted to GF in March and updated, in April, based on the progress of the implementation campaign .
- Micro-planning templates was reviewed and finalised and ToT done at national level.
- After receiving the statement of requirements from the National Malaria Control Programme (NMCP), the Procurement Unit of the MoH invited seven firms to submit bids on 3rd December 2014. The bid opening ceremony was held on 23rd December 2014. Three proposals have been submitted on time while one was rejected due to late submission.
- The bid evaluation report was sent to The Global Fund for their endorsement after which it was sent to Office of Director of Public Procurement (ODPP) where the evaluation report was approved by ODPP in April.
- G4S is in charge of disbursement of funds during the mass campaign

Nigeria:

Population at risk of malaria in Nigeria :				162,000,000 (World Malaria Report 2012)			
Required LLINs :				90,000,000			
LLINs imported into the country three years prior to update :				37,915,945 (AMP Net Mapping Project)			
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	UC - 2 LLIN/HH rolling state by state countrywide)started in May 2009 – completed in May 2013)	64,064,949	57,773,191 distributed from 2009 to 2013 (90.2% of the total National target.)	4,442,853	Operational costs for 27 million LLINs		04.09.13
ANC			33 million nets available for routine distribution in 2013				
EPI							
Totals	N/A	72 million	51,703,880	4,442,853			N/A

Update on April 29th AMP conference call:

- CMA mission is ongoing in Nigeria – AMP TA providers will be on next week’s call for a recent update
- Roll out of CMA pilot is ongoing

- CMA documents will be able to be modified for use by other countries – there will be a good structure there that can be used and adapted to a lot of countries.

Ongoing issues:

- The workshop on LLINs campaign Commodity Management Assessment (CMA) tools development and capacity building anchored by the two AMP Consultants (Alain and Akko) with participants drawn from both NMEP and Partners successfully ended on the 17th March, 2015, followed by an exit meeting with key stakeholders yesterday, 18th March, 2015.
- AMP Consultants to lead the CMA core group to conduct a Pilot CMA in one of the states between 3rd & 4th week of April, 2015
- Following mass campaigns in all states in Nigeria between 2008 and 2013, the country has embarked on LLIN replacement campaigns in 18 of the 36 states in Nigeria in 2013-2015. Funded by GF, close to 50 million nets are planned to be distributed;
- The first replacement campaign in Sokoto state was finalized in December 2013 (2.5 million nets). A further thirteen were finalized between March 2014 and January 2015 (> 33 million nets);
- Distributions in the last three states are ongoing (>13 million nets) and will be finalized by April 2015;

Sudan:

Population at risk of malaria in Sudan :				37,970,000 (World Malaria Report, 2014)			
Required LLINs :				21,094,444			
LLINs imported into the country three years prior to update :				9,040,385 (AMP Net Mapping Project)			
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution			4,262,414 (for 12 states)			M&E	11.03.2015
ANC			122,000				
EPI							
Totals							

Ongoing issues:

- For further details or to offer suggestions, please contact Jenny Cervinskas at the following address: jcervinskas@sympatico.ca
- Need to finalize the zero draft document “Sudan LLIN Tracking System” to the extent possible, taking into account feedback given at the partners’ meeting.
- Sudan has distributed over 12 million LLINs since 2010. Current policy is to use LLINs with a period of time from distribution to the need for a new campaign to be three years.
- The last MIS was done in 2012, and the next one is scheduled for late 2015 (rainy season is from June to November).
- The results from the 2012 MIS showed that the % households with at least one LLIN was 62%; % population slept under an LLN was 14%; under-fives slept under a LLIN was 20%; % pregnant women slept under an LLIN was 13%. The survey found that a main barrier to using LLINs was the lack of availability of LLINs, and that there was a high proportion of households that had nets that were older than 3 years.
- In 2015, 4,262,414 LLINs will be distributed to the twelve target states plus peri-urban Khartoum

- A round of distribution has already taken place in the five states of Greater Darfur (January and February-1.5 million nets) and the mass campaign to distribute 2.7 million nets will take place in June in those states that received LLINs in 2012.
- It is expected that 122,000 LLINs will be available for routine distribution through the health system.
- NMCP is interested to know more about the durability of LLINs and wants to study this under operational conditions found in the country. Questions of interest include: What happens to the LLINs received by the HHs from a campaign? How many are retained in the households? What are the reasons for net loss? What is the condition of the nets over time?

WEST AFRICA REGIONAL NETWORK

WARN countries where update provided listed below. NB: This does not include all WARN countries.

WARN country updates provided on April 29th AMP call: Ghana, Niger

Benin:

Population at risk of malaria in Benin		10,328,934 (2014 population)

Mass distribution	Door-to-door stand alone hang up campaigns completed in 2012	13 million		0			03.04.13
ANC							
EPI							
Totals	N/A	13 million		0			N/A

Update on April 29th AMP conference call:

- The Global Fund FPM is currently in country to negotiate with the NMCP its budget to support a national LLIN campaign with TV / Radio spots to support usage of LLINs
- Greg Pirio, AMP TA provider, has reviewed the TV and radio expenses and did some Internet research on audience size and will provide recommendations at a distance to support this work – input into costing strategy and cost benefit analysis

Ongoing issues:

- Net distribution – Nets for Life is joining the NMCP for mass distribution of 1.5 million nets in the Eastern region.
- It's going to be a point distribution. Initial distribution during the last campaign was house to house, but with high levels of use and limited resources, it has been decided to go ahead with coupling the LLIN distribution to the planned immunisation campaigns
- Coupon distribution will be linked to immunisation campaign – universal coverage campaign 1 net to 1.8
- Malaria Journal paper just published on the cost effectiveness evaluation of the Ghana Hang-Up Campaign. Simple economic modelling was used to investigate the added costs and benefits of hang-up activities as part of a universal LLIN campaign and found that in the case of Ghana, hang-up activities were estimated to be net saving if hang-up increased LLIN use by 10% or more.
- The paper can be accessed with this link: <http://www.malariajournal.com/content/13/1/71>
- Will be topic of discussion on an upcoming AMP call
- School distribution nationwide happening last week of March and 1st week of April
- Nets have arrived and stocked at medical stores

- Nationwide distribution is not being evaluated stand alone, will be part of next MIS

Guinea

Population at risk of malaria in Guinea :		12,132,795 (PMI, 2015)					
Required LLINs :		6,949,395 (2016)					
LLINs imported into the country three years prior to update :		3,502,437 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	2016	6,949,395 (2016)	0	0			17.02.15
Continuous distribution	Under Round10 following mass distribution	949,391	347,000				
ANC							
EPI							
Totals	N/A	7,898,786	347,000	0			N/A

Ongoing issues:

- Have not heard anything about MIS or post campaign follow up evaluation. AMP MORE group will follow up to see what the country's plans are.
- All nets in the 14 prefectures supported by PMI have started distributing nets in health facilities through EPI and ANC on December 29th 2014.
- The CDC Foundation is funding routine distribution of the GF nets, in the context of broader Ebola response.
- Latest data on routine distribution should be presented at the AMP meeting to see how it's going on a process level and if there is an impact on increasing attendance to clinics for malaria.
- It is hoped to get people to increase their confidence in coming back to health centres in the light of the Ebola epidemic
- Seeing some differences in numbers of people presenting for ANC and EPI but data will confirm this for solid comparison
- Health facility staff interviewed believe it is making a difference

Mali:

Population at risk of malaria in Mali :		15,880,000 (World Malaria Report, 2012)					
Required LLINs :		8,822,222					
LLINs imported into the country three years prior to update :		5,888,050 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update

Mass distribution	Roll out by region – UC 1 LLIN/2 people 2012	8.67 million	4.5 million	4,473,801	7,981,194\$		03.04.13
Continuous distribution				695,126			
ANC							
EPI							
Totals	N/A	8.67 million	4.5 million	5,168,927	7,981,194		N/A

Ongoing issues:

- Completing their campaign in Kai region
- PSI was implementing the campaign
- Networks did process evaluation in April
- Delays in getting nets all the way out there: reasons include - registration time was not sufficient; people were not registered; people said they were tired with registration processes; standard problems of transport and deciding who funds what pieces; challenges in prepositioning.
- Waiting for final distribution figures after April distribution before report is finalised
- Initial coverage was low as hadn't had a campaign in the last 3 years
- Looking at a total admin coverage after first phase at around 77%

Niger:

Population at risk of malaria in Niger :		<i>16,080,000 (World Malaria Report, 2012)</i>					
Required LLINs :		<i>8,933,334</i>					
LLINs imported into the country three years prior to update :		<i>1,266,562 (AMP Net Mapping Project)</i>					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	June 2014 – Dosso April 2015: Southern regions		1.6 million 6.4 million			Support to NFM proposal	23.07.14
ANC							
EPI	Routine distribution through EPI clinics						
Totals	N/A		TBC				N/A

Update on April 29th AMP conference call:

- Team working on the net campaign scheduled to start May 16th
- All nets dispatched to secondary stores
- Dispatch to final distribution points will occur in next 2 weeks
- All media activities are ongoing

Sierra Leone:

Population at risk of malaria in Sierra Leone :				<i>6,000,000 (World Malaria Report, 2012)</i>			
Required LLINs :				<i>3,333,334</i>			
LLINs imported into the country three years prior to update :				<i>4,195,850 (AMP Net Mapping Project)</i>			
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	UC door to door integrated with VitA and deworming – June 2014	3,439,044	3.523.873	None		Implementation , Logistics, RM	21.05.14
ANC							
EPI							
Totals	N/A	3,439,044	3.523.873	None			N/A

Ongoing issues:

- Distribution of 3.5 million nets is completed and took place from June 5th to June 15th
- Final report is available
- Hang up campaign planned week of July 1st
- Ongoing Ebola outbreak may cause some disruptions to the post-campaign activities – need to track challenges
- Distribution of LLINs integrated with vitamin A supplementation and deworming.
- One net for 2 people with total of 3.523.873 LLINs available
- Door to door strategy for HH registration and voucher distribution – voucher redemption at fixed point distribution sites.
- Distribution over 10 days rather than 7 originally planned to allow enough time for collection of nets at PHUs.
- 5 day hang-up campaign one week after the distribution
- UMCOR DFID, USAID, World Vision International and Global Fund are the main donors providing nets
- Scope of campaign: covering 13 districts, 149 chiefdoms, 1159 Peripheral units, and including the urban area of Freetown
- National training took place in Freetown last week. MOH will start trainings May 28th onwards
- Ebola outbreak on border chiefdoms with Liberia and Guinea may impact on campaign activities

Togo:

Population at risk of malaria in Togo :				<i>6,150,000 (World Malaria Report, 2012)</i>			
Required LLINs :				<i>3,416,667</i>			
LLINs imported into the country three years prior to update :				<i>3,009,135 (AMP Net Mapping Project)</i>			
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution	Date of most recent update

						channel	
Mass distribution	Q4 2014 replacement campaign	3.9 million (national)	3.970.624 GFATM	None anticipated		Implementation and logistics	30.04.14
Continuous distribution	All routine services interrupted since 2011		Possible surplus from 2014 mass campaign if Lomé is not covered		Funds for continuous distribution available in R9 grant but no disbursement to date		
ANC							
EPI							
Totals	N/A	3.9 million	3.970.624	0			N/A

Ongoing issues:

- Campaign activities (HH registration and distribution) have taken place
- Post campaign evaluation has taken place (rapid assessment)
- 1,7 mil HHs registered
- 1,642,000 HHS have received LLINs
- 279,000 LLINs are left at district level
- Some challenges – gaps with numbers of coupons and registration materials. May have affected quality of registration process
- 92% coverage achieved
- Average of 3.8 persons per HH were registered.
- Problems with insufficient human resources
- Size and texture of LLINs are things that beneficiaries are complaining about – two types of nets were distributed during the campaign – complaints about quality of nets.
- People with coupons who did not receive nets – need to be reached now – LLINs left will be used to cover these gaps, but presents challenges.

CENTRAL AFRICA REGIONAL NETWORK (CARN)

CARN countries where update provided listed below. NB: This does not include all CARN countries.

CARN country updates provided on April 29th AMP call: None

DRC:

Population at risk of malaria in DRC :		67,730,000 (World Malaria Report, 2012)					
Required LLINs :		37,627,777					
LLINs imported into the country three years prior to update :		30,803,765 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update

ANC							

EPI							
Totals	N/A	35,000,000	19,094,251	13,445,599			N/A

Ongoing issues:

- PMI put together their annual malaria operational plan
- Discussions were held on calendar of continued support for the provincial level campaigns, as well as on plans for piloting routine distribution through schools and community based channels
- For 2017, the country is looking at campaigns in Maniema, in Bas Congo, Kasai Occidental and Oriental provinces.
- For piloting of routine activities, NMCP would like to pair piloting in provinces where campaigns have recently been done with continued piloting and scaling up of continuous distribution interventions.
- Interest in testing out both school and community based channels.

Equatorial Guinea:

Population at risk of malaria in Equatorial Guinea :		<i>720,000 (World Malaria Report, 2012)</i>					
Required LLINs :		<i>400,000</i>					
LLINs imported into the country three years prior to update :		<i>52,000 (AMP Net Mapping Project)</i>					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	2011 campaign never rolled out	433,000	449,226	0			03.04.13
ANC							
EPI							
Totals	N/A	433,000	449,226	0			N/A

Ongoing issues:

- Continued planning of distribution in Bioko. Should conclude in another 2-3 months from now.
- Draft distribution plan for Bioko campaign has been shared by MCDI with AMP for review and feedback at a distance.
- After some delays, expecting to start distribution of LLINs on Bioko as of the second half of October
- MCDI is looking for a consultant who can review the draft distribution plan and oversee the initial week or so of distribution.

Tchad:

Population at risk of malaria in Tchad :		<i>11,410,000 (World Malaria Report, 2012)</i>					
Required LLINs :		<i>6,338,889</i>					
LLINs imported into the country three years prior to update :		<i>8,577,547 (AMP Net Mapping Project)</i>					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update

Mass distribution	2014 TFM to cover 9 regions out of 11	8,177,640	8 151 792	146 943			03.04.13
Continuous distribution	2013 routine distribution only		762,941				
ANC							
EPI							
Totals	N/A	8,177,640	7,148,020	1,792,561			N/A

Ongoing issues:

- 5 million nets from GF procured by UNICEF
- Mission report will be made available to the AMP partnership once completed
- In 2014 they plan to do a mass distribution, and estimate the need to be 8,177,640 nets.
- Between TFM, other commitments, carryover from 2013 and 1M from the French (not confirmed), the gap is only 26,385 (if this is the case, MNM might just cover the rest). Without the French, the gap is still over 1M nets.

EAST AFRICA REGIONAL NETWORK (EARN)

EARN countries where update provided listed below. NB: This does not include all EARN countries.

EARN country updates provided on April 29th AMP call: None

Burundi:

Population at risk of malaria in Burundi :		6,690,000 (World Malaria Report, 2012)					
Required LLINs :		3,716,667					
LLINs imported into the country three years prior to update :		4,433,813 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	UC 1.8 ratio Feb/March 2014	5,165,200	5,158,410	6,790		Implementation , Logistics	03.04.13
ANC							
EPI							
Totals	N/A	5,165,200	5,158,410	6,790			N/A

Ongoing issues:

- Final review of the post campaign report is ongoing and will be shared this week with the country
- Country needs to submit it as an annex to their concept note for NFM funding to the GF

Kenya:

Population at risk of malaria in Benin	9,662,685 (2013 population census)
---	------------------------------------

Required LLINs :		<i>5,368,158</i>					
LLINs imported into the country three years prior to update :		<i>4,845,882 (AMP Net Mapping Project)</i>					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	<i>National universal coverage replacement campaign in 23 counties</i>		<i>12.6 million</i>	<i>0</i>		<i>Logistics and longer term coordination</i>	<i>30.06.14</i>
ANC							
EPI							
Totals	N/A		12.6 million	0			N/A

Ongoing issues:

- MCU has been contacted to request the validation of the process evaluation report so it can be shared.
- Plan of action was a weak document – AMP to support by distance to strengthen this
- Meeting was held between MCU Kenya, USAID-PMI, the Global Fund and AMP - AMP TA provider presented the results of phase 1 of the distribution and the process evaluation
- Looking at getting quantitative data gathered to adapt to phase 2 activities planned in 2015 but not much traction from the country on this.
- Waiting for the MCU to give approval on review of the final report for process evaluation before it is widely circulated
- Community MIS will take place before the end of the year – some of the questions on the AMP supported questionnaire will be used
- AMP is supporting Phase I distribution of 3 million LLINs in Western Kenya with a process evaluation
- Phase 1 of campaign will be complete before the end of 2014.
- Phase II of campaign 5.6 million LLINs will be complete in 17 counties in 2015
- There are 0.7 million nets that have no operational costs – 812,000 USD gap for high burden area to be covered

Uganda:

Population at risk of malaria in Uganda :		<i>34,550,000 (World Malaria Report, 2012)</i>					
Required LLINs :		<i>19,194,444</i>					
LLINs imported into the country three years prior to update :		<i>12,480,685 (AMP Net Mapping Project)</i>					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	Two phases: P1 completed – May	19.64 million	11,653,054 (11,003,054 from GFATM Rd7 Phase	4 million		Implementation	03.04.13

	2010-January 2011 (7,293,689 LLINs distributed) ; P2 distribution planned to start in 2013		11 and 650,000 from USAID/PMI)				
ANC	PMI supported ANC distribution ongoing in approx. 40% of the country						
EPI							
Totals	N/A	19.64 million	11,653,054	4 million			N/A

Ongoing issues:

- The Malaria Journal paper just published on the study on barrier to net use that was conducted in Uganda is available at the following link: <http://www.malariajournal.com/content/13/1/82>
- Now completed distribution of 11 million nets in 67 districts
- Additional 5 mil nets in country for distribution - remaining balance to complete UC in February

SOUTHERN AFRICA REGIONAL NETWORK (SARN)

SARN countries where update provided listed below. NB: This does not include all SARN countries.

SARN country updates provided on April 29th AMP call: None

Mozambique:

Population at risk of malaria in Mozambique:		25,800,000 (World Malaria Report, 2014)					
Required LLINs :		14,333,333					
LLINs imported into the country three years prior to update :		11,784,524 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution						TBD	24.04.14
ANC							
EPI							
Totals	N/A						N/A

Ongoing issues:

- Mozambique is interested in conducting a nationwide campaign – distribution would be planned for Q1 of next year (2016) and may need support from AMP in planning process throughout 2015. To be followed up.

Swaziland:

Population at risk of malaria in Swaziland :		337,000 (World Malaria Report, 2012)					
Required LLINs :		187,223					
LLINs imported into the country three years prior to update :		91,725 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution						BCC	03.04.13
ANC							
EPI							
Totals	N/A						N/A

Ongoing issues:

- Need to follow up with the country after communication mission last year to see how far they have come with recommendations and plan next phase of support
- Swaziland is currently working towards elimination
- NMCP and AMP TA provider have reviewed previous communication strategic plans aimed at the community at large.
- NMCP and AMP TA provider are reviewing the acceptance of interventions
- Will work on outreach via health workers in rural health areas. Will focus on population travelling through Swaziland mainly from Mozambique
- Are looking at a plan to have malaria prevention meeting with both traders that travel to boarder countries and Mozambique population in Swaziland
- Working to enhance communication activities in high burden areas via the creation of malaria elimination committee meetings
- Looking at targeting the transport industry with IEC materials for lorry drivers.
- Messaging to travellers to take precautions when they travel to Mozambique
- Will pass messages on malaria prevention in schools, churches, mosques.
- The programme is working on the concept note for the NFM to be submitted by June 15th - the concept note is now close to final, but they are still revising the health promotion section.
- They have just finished data collection in the field for the KAP survey which they are conducting
- Just from being in the field even though analysis has not been done yet, the team have clearly observed that nets are not being used. There is low risk perception because of the low malaria disease burden in the country
- In their NSP, nets have not been included and the Global Fund (whose team is currently in-country) agree that they should not be
- However, there are nets that were procured last year which had not yet been distributed. The plan with those was to replace/replenish the old nets. Now Global Fund has given the Programme the go-ahead to distribute them
- The exercise may commence beginning of the malaria season round September or so
- These will probably be the last batch of nets
- The strategy will then be to focus on IRS, environmental management etc.

- The plan is still to promote usage as there are nets currently awaiting distribution.

ASIA PACIFIC

Asia Pacific country updates provided on April 29th AMP call: None

Indonesia:

Population at risk of malaria in Indonesia :		51,900,000 (World Malaria Report, 2012)					
Required LLINs :		28,833,333					
LLINs imported into the country three years prior to update :		8,192,770 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	2014						25.09.13
ANC							
EPI							
Totals	N/A		365,000				N/A

Ongoing issues:

- Campaign rolled out and seems to have gone very well
- Distribution was finalised on the last week of September
- 3.5 million nets going out
- Campaign delayed due to delays in shipment – delivery needs to go to district level. Campaign should roll out around 3rd week of September
- Quality of micro planning so far reported to be excellent

Pakistan:

Population at risk of malaria in Pakistan:		147,773,000 (World Malaria Report, 2013)					
Required LLINs :		26,599,140					
LLINs imported into the country three years prior to update :		3,338,948 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI							
Totals							

Ongoing issues:

- Sent new ITN strategy document to AMP for review

- Support will be required from members of the partnership to take a look at different sections and review and feedback to the country.
- Finalizing national strategy for LLINs distribution in Pakistan
- Planning to distribute 5.2 Million LLINs during next 18 months, starting April 2015
- 900,000 LLINs per 3 month/quarter
- Before 23 March the district wise distribution of 5.2 M LLINs will be finalized
- AMP has provided advice to the DoMC on strategy for LLIN package disposal.
- Pakistan recently developed "National M&E Framework and Impact Assessment Tools" for LLIN intervention in Pakistan
- Before distribution of LLINs the country is re-designing the strategy and national guidelines and revising their training modules
- 9 million LLINs have been distributed over the last 6 years but their M&E plan was not strong, so this component is to be strengthened for assessment
- Impact assessment guidelines and indicators have been developed. M&E framework recently designed by the programme for better ownership and implementation.
- Means of verification have been integrated in the M&E framework for better accountability
- The strategy defines a role for each partner in the operation (national and international partners).
- Decentralised system of government is reflected in the plan
- Baseline has been set for the impact assessment
- The M&E framework can be used for any programme
- The programme manages security aspect by assessing potential risks
- Net Mapping group received information from Pakistan – very good data received of last 3-4 years of how many nets have been distributed per district – to be used as key country by AMP in mapping district level distribution.
- DMC will circulate all revised ITN strategy and revised training materials. Marcy will be sending to various individuals in the partnership to review different sections and get input from AMP
- Malaria accounts for 16% of total case load in the country

Papua New Guinea:

Population at risk of malaria in Papua New Guinea :		7,011,000 (World Malaria Report, 2012)					
Required LLINs :		3,895,000					
LLINs imported into the country three years prior to update :		3,464,400 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							03.04.13
ANC							
EPI							
Totals	N/A		365,000				N/A

Ongoing issues:

- PNG because of resource constraints shifted from UC back to under 5s campaigns.
- Under 5 campaign took a lot more planning than the UC distribution that was previously conducted.
- Collecting data was very expensive – overall 10% extra cost and seems that cost of distribution was over 2 dollars per net.
- PNG is all mountainous region so logistics are horrific to get nets out of the city
