

# AMP The Alliance for Malaria Prevention

Expanding the ownership and use of mosquito nets

---

**AMP Conference call minutes:** [www.allianceformalariaprevention.com](http://www.allianceformalariaprevention.com)

13<sup>th</sup> September 2017

Dial-in number: +1-213-787-0529  
USA toll-free: 888-808-6929  
Access Code: 3904916

If you wish to be added to or taken off this mailing list please contact: [melanie.caruso@ifrc.org](mailto:melanie.caruso@ifrc.org)

Do you have a topic / issue / country specific update to share with the AMP partnership? Send a summary of the topic you would like to discuss to: [jason.peat@ifrc.org](mailto:jason.peat@ifrc.org) or [melanie.caruso@ifrc.org](mailto:melanie.caruso@ifrc.org) and we will schedule your update at the start of an upcoming AMP conference call.

## **Agenda – September 13th AMP conference call**

Chair : Jason Peat  
Rapporteur : Melanie Caruso

- Introductions
- Review of minutes from last week's AMP conference call
- Country Updates
- Working Group Updates
- AOB

Next conference call: Wednesday, 20th September 2017 10:00 EST, 14:00 GMT / UTC, 16:00 CET

## **Participants:**

AMF:	Peter Sherratt
AMP participants:	Jean-Marc Gregoire, James Ssekitooleko, Kamel Maina, Hamisu Hassan
BASF:	Alex Heimsch
Buy a Net:	
CDC / PMI:	
CRS:	Zainab Ali
Disease Control Technologies:	
Global Health Partners:	
IFRC:	Marcy Erskine
Independent participants:	
Intelligent Insect Control:	
IPHA:	Jessica Rockwood
JC Flowers Foundation:	
JHU Centre for Communications:	Andrea Brown, Sean Blaufuss, Hunter Harig, Hannah Koenker
JSI:	
MCDI:	
Milliner Global Associates:	John Milliner
Nets for Life:	
PLAN Canada:

<b>Totals</b>	<b>N/A</b>	5,738,297	6,050,272	<b>0</b>			<b>N/A</b>

**Update on September 13<sup>th</sup> AMP conference call:**

- Two days of national strikes planned on the same day that HH registration is scheduled to start.
- Country has submitted the Rapid Monitoring Tool for the HH registration to GF for review and approval.
- Training for HH registration is ongoing
- Working to integrate Peace Corps volunteers in activity.
- Plans for phase 2 are detailed as follows :

Activités Majeurs	Dates
Formation des formateurs	29 Août au 1er septembre
Identification des dénombreurs	5 au 10 Septembre
Formation des statisticiens	4 au 10 septembre
Formation des journalistes	4 au 10 septembre (différents acteurs)
Formation des superviseurs de proximité et dénombreurs	11 au 14 septembre
Convoyages des outils de dénombrement vers les ZS	Juste après la formation des formateurs
<b>Dénombrement des ménages</b>	<b>15 au 24 septembre</b>
Supervision de l'activité de dénombrement	Idem (15 au 24 septembre)
Monitoring /Evaluation rapide de la campagne de dénombrement	Idem (15 au 24 septembre)
Synthèse du dénombrement	25 au 30 septembre
Formation logistique des zones au niveau	2 au 4 octobre

Convoyages des outils de distribution vers les ZS	Juste après le dénombrement des ménages (autres acteurs impliqués)
Vérification des disposition logistiques	5 au 14 octobre
Convoyages des MIILD aux Arrondissements	5 au 14 octobre
Formation des distributeurs	16 au 17 octobre
Lancement distribution	18 octobre
Distribution des MIILD	19 au 22 octobre
Incitation d pour la 2ème phase	23 au 29 octobre
Evaluation au lendemain	31 au 5 novembre

### **Burkina Faso:**

<b>Population at risk of malaria in Burkina Faso</b>		10,328,934 (2014 population)					
<b>Required LLINs :</b>		5,738,297					
<b>LLINs imported into the country three years prior to update :</b>		4,845,882 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI							
<b>Totals</b>							

### **Ongoing issues:**

- Team coming to Geneva for grant negotiations with the GF on the 3<sup>rd</sup> week of September at which the AMP team has been asked to join
- 2 AMP TA providers assisted in country working on the planning for the 2019 campaign
- In process of negotiating the submission to the Global Fund

### **Burundi:**

<b>Population at risk of malaria in Burundi :</b>		6,690,000 (World Malaria Report, 2012)					
<b>Required LLINs :</b>		3,716,667					
<b>LLINs imported into the country three years prior to update :</b>		4,433,813 (AMP Net Mapping Project)

**Update on September 13th AMP conference call:**

- **From Burundi sitrep:** Burundi is implementing a LLIN mass distribution campaign to a registered population of 11,477,801. PNILP and CARITAS Burundi are co-PRs in management of the GF financed campaign.
- National population according to micro-plan is estimated at 11,658,396.

Micro Plan			Registration			Ordered	Projected Surplus
HHs	Population	LLIN	HHs	Population	LLIN	LLIN	LLIN
2,484,550	11,658,396	6,425,403	2,345,834	11,477,801	6,185,605	6,471,695	286,090

- The 6,471,695 nets ordered in mid-October 2016, are sufficient to cover the registered population at an average of 2.6 nets per household.
- Conference call with the LFA to prepare for their monitoring of the distribution;
- Meetings with USAID to discuss campaign status and processes;
- A Steering Committee (Comité de pilotage) meeting was held on 11 Sep;
- National distribution is set for September 18-22 and preparation process is ongoing;
- The Rapid survey final report issued;
- Net transport and positioning from commune warehouses to DPs start on Sep 13;
- Vehicle rental for days of distribution is complete;
- Distribution tools shipped and in process of being positioned at DPs;
- Distribution training took place during the week of Sep 4<sup>th</sup>;
- No decision made regarding existing (129,270) nets from previous donations and campaigns;
- Procedure need to be established on how to proceed during distribution with approx. 35,000 HHs that are not registered;
- Radio and TV distribution ads are set to start from Friday 14 September;

**Ongoing issues:**

- Dates set for distribution September 18<sup>th</sup> to 22<sup>nd</sup>
- Transport contract signed
- GF has approved budget to transport LLINs
- Training is complete for distribution activities
- Discussing communications
- 1.3% of HH missed or 33,000 HH
- There was a larger problem in Bujumbura Marie and Bujumbura Rural where people refused to be registered.

**Central African Republic (CAR):**

Population at risk of malaria in CAR :		4,490,000 (World Malaria Report, 2012)					
Required LLINs :		2,494,445					
LLINs imported into the country three years prior to update :		162,870 (AMP Net Mapping Project)

<b>EPI</b>							
<b>Totals</b>	<b>N/A</b>	<b>2.2 million</b>	<b>2.2 million</b>	<b>0</b>			<b>N/A</b>

**Update on September 13th AMP conference call:**

- Need to finalize contracts with implementing partners
- Need to finalize mobile warehousing for LLIN distribution in Bangui
- Launch is planned for October 25<sup>th</sup> in Bangui
- Will work to get as many LLINs out as possible out before the end of 2017

**Chad:**

<b>Population at risk of malaria in Tchad :</b>		<i>11,410,000 (World Malaria Report, 2012)</i>					
<b>Required LLINs :</b>		<i>6,338,889</i>					
<b>LLINs imported into the country three years prior to update :</b>		<i>8,577,547 (AMP Net Mapping Project)</i>					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update

<b>Totals</b>	<b>N/A</b>	<b>8,177,640</b>	<b>7,148,020</b>	<b>1,792,561</b>			<b>N/A</b>

**Ongoing issues:**

- The 3<sup>rd</sup> Chad Universal Coverage LLIN distribution campaign started in January 2017. 1<sup>st</sup> in 2011 and 2<sup>nd</sup> in 2014.

- Estimated 2017 campaign target population of 9,428,950/1,571,492 HHs living in 12 of the country's 23 regions.
- 6,582,600 LLINs (including a buffer stock of 1 million) LLINs were procured
- The 2017 campaign is implemented in 5 phases as per table below
- Gap dropped significantly down to about 225'000 net gap for 2 regions – solutions could be to roll back nets from refugee settings and get government to donate additional nets
- Destruction of plastic bags: built in to Global Fund grant the building of incinerators.

**Congo Brazzaville:**

<b>Population at risk of malaria in Congo Brazzaville:</b>							<i>(World Malaria Report)</i>
<b>Required LLINs :</b>							
<b>LLINs imported into the country three years prior to update :</b>

**Update on September 13th AMP conference call:**

- First two provincial level distributions are underway in Maniema and Kasai.

**Ongoing issues:**

- Finished all previous distributions within current Global Fund grant
- Applying for NFM round 2 starting early next year
- Need to follow up on plans for reporting on coverage post-distribution

**Ghana:**

<b>Population at risk of malaria in Ghana :</b>		25,000,000 (World Malaria Report, 2012)					
<b>Required LLINs :</b>		13,888,888					
<b>LLINs imported into the country three years prior to update :</b>		15,780,153 (AMP Net Mapping Project)

<b>Totals</b>	<b>N/A</b>	<b>13 million</b>		<b>0</b>			<b>N/A</b>

**Update on September 13th AMP conference call:**

- Ghana will use mobile app to support HH registration
- Ghana requested AMP TA but no AMP TA providers are available.
- VW will look at providing TA support
- Meeting later in the week to finalize campaign action plan and training manuals
- Ghana has declined LLINs from Against Malaria Foundation and will use LLINs from routine distribution and savings in grant to cover all LLIN needs.
- GF team is in country next week
- Nets are at the port and need to be cleared through customs and stored.

**Ongoing issues:**

- Planning for the mass campaign is behind schedule.
- Plan to distribute 15.7 million LLINs between Jan – Nov. 2018
- Distribution will take place over two phases Jan – May 2018 and July – November 2018
- Plan a pilot distribution in October or November 2017 in two districts
- Nets arrive in country in two phases mid-October 2017 and July 2018
- Storage planning at central level then on to region.
- No formal campaign planning committee but working on a planning retreat

- Will use a mobile app to support HH registration and tracking of LLINs

**Liberia:**

<b>Population at risk of malaria in Liberia :</b>				4,130,000 (World Malaria Report, 2012)			
<b>Required LLINs :</b>				2,294,444			
<b>LLINs imported into the country three years prior to update :</b>				2,896,136 (AMP Net Mapping Project)

<b>EPI</b>							
<b>Totals</b>	<b>N/A</b>						<b>N/A</b>

**Ongoing issues:**

- As with CAR are working to improve accountability of the last mile in supply chain between most proximate storage site and team of volunteers doing HH distribution
- Idea is to have mobile warehouses
- Volunteers take LLINs from mobile warehouses via a supervisor. Will require signed paperwork by volunteer, supervisor and warehouse manager.
- VectorWorks and Mozambique NMCP are working on a pilot school based distribution.
- Will be a small-scale pilot between mass distributions.
- 25,000 LLINs per year for two years
- Waiting for confirmation from MoH on programme

- Baseline end of Oct / early November 2017
- 1<sup>st</sup> distribution March 2018 the second in March 2019
- Will have distribution and control district for evaluation purposes

**Nigeria:**

<b>Population at risk of malaria in Nigeria :</b>				<i>162,000,000 (World Malaria Report 2012)</i>			
<b>Required LLINs :</b>				<i>90,000,000</i>

<b>ANC</b>			33 million nets available for routine distribution in 2013				
<b>EPI</b>							
<b>Totals</b>	<b>N/A</b>	<b>72 million</b>	<b>51,703,880</b>	<b>4,442,853</b>			<b>N/A</b>

**Ongoing issues:**

- AMP service contract is in place with Global Fund PR CRS
- Campaign timelines in the 5 GF states, the one for Adamawa is not yet out.
- Edo - 2 July - 29 Aug (IP - CRS - paper based)
- Osun - 16 July - 12 Sept (IP - SFH? - paper based)
- Kwara - 23 July - 11 Sept (IP - CRS - Technology)
- Ondo - 17 Sep - 7 Nov (IP - CRS - Technology)
- Imo - 17 Sept - 7 Nov (IP - CRS - Technology)
- Request received from NMEP for support on the development of implementation guidelines to revise them for complex settings state with a focus on Adamawa.
- Postponement of campaign in 2 states
- Adamawa microplanning should be ending today
- Waiting for NMEP to provide status of distribution in emergency states. Last update was that nets have reached state capital.

**Pakistan:**

<b>Population at risk of malaria in Pakistan:</b>		147,773,000 (World Malaria Report, 2013)					
<b>Required LLINs :</b>		26,599,140					
<b>LLINs imported into the country three years prior to update :</b>		3,338,948 (AMP Net Mapping Project)

ANC							
EPI							
<b>Totals</b>	<b>N/A</b>	<b>4.18 million</b>					<b>N/A</b>

**Ongoing issues:**

- Sierra Leone conducted an integrated 2017 campaign tied to the biannual mother-child health weeks. The interventions, vitamin A and albendazole targeting children under five years of age, were integrated with the universal coverage LLIN distribution. The strategy for LLINs was 1 net for 2 people, with a maximum of 3 nets per household.
- Distribution is completed
- NMCP to present on results in an upcoming AMP call

**Tanzania:**

<b>Population at risk of malaria in Sierra Leone :</b>					<i>(World Malaria Report, 2012)</i>

<b>Mass distribution</b>						CMA	26.01.17
<b>ANC</b>							
<b>EPI</b>							
<b>Totals</b>							

**Ongoing issues:**

- During the course of 2016, Vectorworks has implemented, in collaboration with Tanzania’s NMCP, a school-based LLIN distribution program in 7 of the 26 regions of the country. The SNP4 program covered 5,231 schools with a total of 1,153,955 LLINs distributed.
- Vectorworks is now planning to conduct a commodity management assessment (CMA) of the SNP4 supply chain in order to document the level of accountability and transparency achieved in the management of the LLINs from point of entry to distribution to beneficiaries, specifically to:
  - o Verify that adequate tools and procedures were used for proper tracking of LLINs and control of the supply chain (receiving, warehousing, transport and distribution of the nets).
  - o Verify the existence of clear and complete “audit trails” for the nets: a series of documents (waybills, stock sheets, inventory control cards, tally sheets) recording each step in the transport, storage and distribution of the nets.
  - o Verify the proper filing and quality of supply chain tracking tools. Document the extent to which reports are complete and reliable (supported by corresponding waybills, stock sheets, inventory control cards and tally sheets).
- AMP was requested to provide TA for the development of a CMA package and training of a local firm to conduct the CMA field work and produce a report outlining detailed findings, including recommendations for improvement of the logistics systems if/where needed.
- Continued meetings last week with entities involved in the SNP4 supply chain to finalize the gathering of all information and data required for the development of the CMA tools, SoPs and CMA report format.
- Meeting last Friday with the representatives of the firm contracted to carry out the CMA in order to review all the data and information obtained thus far and to introduce the basic principles on which the CMA data collection tools will be developed
- Development of the CMA data collection tools and drafting of the CMA SoPs over the course of last weekend. Development of the tools posed some particular challenges as the SNP4 supply chain structure and management tools differ in many aspects from normal/standard setup and procedures.
- Beginning of the training (of the contracted firm) on Monday and Tuesday (today).

**Togo:**

<b>Population at risk of malaria in Togo :</b>				6,150,000 (World Malaria Report, 2012)

**Update on September 13th AMP conference call:**

- Sitrep attached to the minutes of this week's call
- The campaign supply chain and management structure breakdown divides the country into 6 regions, 40 districts, 719 Health Centres and 2,491 Distribution points.
- Distribution of LLINs to the population originally planned for end of June was reprogrammed to end of July, early August and finally September 20 to 24<sup>th</sup> due to delays in:
  - o LLINs arriving in country,
  - o procurement of materials for household registration delayed,
  - o awarding of contract for transport from District to Distribution Points (Estimated August 25<sup>th</sup>)
  - o re-programming quantification strategy for distribution due to deficit for sleeping spaces.
- After analysis of possible quantification scenarios for LLIN distribution, distributing nationwide according one LLIN per 2 people was proposed to the CNO August 25<sup>th</sup> and to the Minister of health on August 28<sup>th</sup>
- At a meeting with the Minister of Health August 31<sup>th</sup> to further review options the possibility was proposed of splitting the distribution into 2 phases. If nets are distributed according to what is written on coupons ie 1 per sleeping space part of the country has to wait for a 2nd phase distribution in 6 to 8 months while the 825 000 gap is procured.
- The option chosen is distributing in September according to sleeping spaces in all districts other than the Lome Urban area was chosen. A second distribution for the Lome urban area will be programmed in 2018 when the LLINs will be available.
- The 350 contracted personnel for data entry of all the vouchers as agreed to by AMF and the Togo government has been encountering organisational problems and delays. All data for the 105 % of the AMF supplied distribution areas is done. The raw data still has to be cleansed and integrated into one package before sending to AMF.
- Togo internet providers have not been able to provide a high speed fibre optic internet connection to the data entry local to permit using the AMF data management program. The PR had data operators use

their individual computers and a NMCP data entry program. Assembling data from the different sources has been a major headache and reason for the delays.

- Information received at end of day announces protest marches by opposition parties on March 19<sup>th</sup> and 20<sup>th</sup>. If this were to be confirmed it is very probable that the distribution planned for September 20-24 be postponed.

Logistics/supply chain:

- All LLINs were stored in central warehouses in the Lomé area awaiting shipment to District level which started June 15<sup>th</sup>.
- The Togo armed forces has completed the pre-positioning 85% of LLINs according to micro-planning needs to District level. Wary of using military vehicles during the recent civil disturbances they have been unable to finish positioning the last 15% to the District warehouses.
- All but 3 District have finished positioning of district stocks to Health Centres. Final shipments of the 85 % should be done by September 16<sup>th</sup>.
- NMCP has mobilised alternate government vehicles to send the final 15 % to the Districts for those health centres close to the district warehouses.
- Positioning only the nets needed for Distribution in all but the 5 districts of Lome Commune and Golfe will leave a balance of 778 096 LLINs to be stored at a government warehouse in Lome till the 825,000 net gap is procured for the second distribution in 2018.

Upcoming events (Planned pending confirmation re political protests)

- September 13<sup>th</sup> to 19<sup>th</sup> positioning of LLINs from the 719 Health centres to the 2,491 Distribution Points
- Official launch of the distribution is planned for September 19<sup>th</sup> Notsé, in Plateau region
- Distribution to population September 20<sup>th</sup> to 24<sup>th</sup>
- National and regional supervisors are to carry out a physical inventory of District and Health Centre warehouses to validate stock positions before distribution.
- Physical inventories at HC level are also to be verified after the distribution by supervisors as part of the end process survey.
- A 3 day rapid end process survey after the distribution
- A MIS survey which will identify coverage and usage is being programmed. (in October?)

**Uganda:**

<b>Population at risk of malaria in Uganda :</b>				<i>34,550,000 (World Malaria Report, 2012)</i>			
<b>Required LLINs :</b>				<i>19,194,444</i>

	2010-January 2011 (7,293,689 LLINs distributed) ; P2 distribution planned to start in 2013		11 and 650,000 from USAID/PMI )				
<b>ANC</b>	PMI supported ANC distribution ongoing in approx. 40% of the country						
<b>EPI</b>							
<b>Totals</b>	<b>N/A</b>	<b>19.64 million</b>	<b>11,653,054</b>	<b>4 million</b>			<b>N/A</b>

**Update on September 13th AMP conference call:**

- LLIN study on PBO LLINs is ongoing. 6 million LLINs distributed in Uganda.
- Evaluation (cross sectional survey) is on track and is being supported by IDRC, London School, Liverpool School
- Final results of evaluation will be available in two years time.

**Ongoing issues:**

- Net gap of 4 million nets has been filled to be able to complete the campaign
- 5 districts waiting for AMF nets
- Wave 6 scheduled for November and prep activities will be underway soon
- Wave 5 in underway now
- Plan to complete distribution in 2017 and reserve 2 months buffer in 2018.

**Ongoing issues:**

- Guinea-Bissau implemented a Universal Coverage LLIN distribution campaign planned for an estimated population of 1 821 040. In compliance with the three-year replacement cycle to maintain universal coverage the 2017 campaign is a follow up to the 2014 LLIN universal distribution campaign
- Distribution took place from 21<sup>st</sup> May to 4<sup>th</sup> June
- All activities were implemented as planned
- A presentation of results will be shared soon to the AMP partnership
- Campaign planning began with support of AMP in late January/early February. Follow up support from AMP for logistics and implementation also went a long way to manage the process of campaign planning
- Most challenges that were met kept repeating themselves such as lack of technical support and struggle with capacity and human resources.

- Challenge in identifying and recruiting volunteers at community level for HH registration and distribution. Needed to have lists of people validated and sent through to a mobile server for payment – difficulties in managing this to get info from district to central level. Because we could not use mobile money, this led us to have rent over 12 vehicles over 2 months which placed heavy burden on the budget. Had to continuously make revisions to the budget on a weekly basis which was also a challenge.
- Challenges in positioning of nets from health centers to distribution points, there were a lot of transportation challenges that delayed nets reaching distribution points at the time of the campaign. Needed to do a mop up at end of campaign to make up for this.
- Monitoring of HH registration was done by an independent research center
- Over 2 million people reached.
- Planning to do post campaign impact survey with access and use results. Should be able to compile these results with campaigns in 2011 and 2014. Results should be available by end of first trimester of 2018.

**Mali:**

<b>Population at risk of malaria in Mali :</b>				<i>15,880,000 (World Malaria Report, 2012)</i>

**Ongoing issues:**

- Completed distribution in 2 states
- Other state to be completed by end of September
- 120,000 nets looted in July, and think there may be another 500,000 at risk.
- The rest of the stocks are in a secured compound in Juba

- PSI has found 11 local partners to work with
- Malaria is the top cause of morbidity in IDPs and non-conflict affected areas (see attached WHO surveillance bulletin).
- Malaria cases in Bentiu PoC and Malakal PoC exceeded expected levels in the week. Response:
  - o Bentiu POC – PSI has completed the distribution of LLINs in the POC site. Last week also sent RDTs and ACTs to UNICEF who are on the ground to help with any response. With this, we expect the Malaria situation to be contained.
  - o Malakal POC – Due to challenges of insecurity, we were not able to deliver the LLINs by road. We are engaging constantly with the Logistics Cluster for support in Airlifting the LLINs.
- An “expedited” distribution process has been developed based on food distributions. This means that we register and issue nets immediately.

**Sudan:**

<b>Population at risk of malaria in Sudan :</b>		37,970,000 (World Malaria Report, 2014)

**Ongoing issues:**

- Need to follow up with the country after communication mission last year to see how far they have come with recommendations and plan next phase of support
- Swaziland is currently working towards elimination
- NMCP and AMP TA provider have reviewed previous communication strategic plans aimed at the community at large.
- NMCP and AMP TA provider are reviewing the acceptance of interventions
- Will work on outreach via health workers in rural health areas. Will focus on population travelling through Swaziland mainly from Mozambique
- Are looking at a plan to have malaria prevention meeting with both traders that travel to boarder countries and Mozambique population in Swaziland
- Working to enhance communication activities in high burden areas via the creation of malaria elimination committee meetings
- Looking at targeting the transport industry with IEC materials for lorry drivers.
- Messaging to travellers to take precautions when they travel to Mozambique
- Will pass messages on malaria prevention in schools, churches, mosques.
- The programme is working on the concept note for the NFM to be submitted by June 15th - the concept note is now close to final, but they are still revising the health promotion section.
- They have just finished data collection in the field for the KAP survey which they are conducting
- Just from being in the field even though analysis has not been done yet, the team have clearly observed that nets are not being used. There is low risk perception because of the low malaria disease burden in the country
- In their NSP, nets have not been included and the Global Fund (whose team is currently in-country) agree that they should not be
- However, there are nets that were procured last year which had not yet been distributed. The plan with those was to replace/replenish the old nets. Now Global Fund has given the Programme the go-ahead to distribute them
- The exercise may commence beginning of the malaria season round September or so
- These will probably be the last batch of nets
- The strategy will then be to focus on IRS, environmental management etc.
- The plan is still to promote usage as there are nets currently awaiting distribution.

**ASIA PACIFIC**

**Asia Pacific country updates provided on September 13th AMP call: None**

**Haiti:**

<b>Population at risk of malaria in Haiti :</b>							
<b>Required LLINs :</b>							
<b>LLINs imported into the country three years prior to update :</b>							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update

<b>Totals</b>	<b>N/A</b>		<b>365,000</b>				<b>N/A</b>

**Ongoing issues:**

- PSI has made a request for TA for 2017 Haiti campaign
- AMP has reached its maximum capacity from now until the end of the year and it is possible that no TA providers may be available to support this request unfortunately.

**Indonesia:**

<b>Population at risk of malaria in Indonesia :</b>				<i>51,900,000 (World Malaria Report, 2012)</i>			
<b>Required LLINs :</b>				<i>28,833,333</i>			
<b>LLINs imported into the country three years prior to update :</b>				<i>8,192,770 (AMP Net Mapping Project)</i>

**Ongoing issues:**

- 1.2 million nets from AMF for 2017
- 1.6 million nets from AMF for 2018
- Looking to shift to school based distributions. Would like help assessing this.
