Expanding the ownership and use of mosquito nets

AMP 2014 Partners meeting February 17<sup>th</sup> and 18<sup>th</sup> 2014  
Geneva, Switzerland

## **AMP Positioning**

---

*“The Alliance for Malaria Prevention is a multi-sectorial partnership within Roll Back Malaria supporting countries, in collaboration with working groups, to achieve Global Malaria Targets and the 2015 MDGs.”*

## **AMP Mission statement**

---

*“ The Alliance for Malaria Prevention (AMP) is a partnership focused on malaria prevention with LLINs, both through mass distribution campaigns and through continuous distribution channels, to achieve and maintain universal coverage targets. AMP focuses on the development and sharing of best practices, lessons learned and recommendations for malaria prevention with LLINs, and supports implementation of LLIN distribution activities with the objective of strengthening skill sets and capacity at country level. AMP is uniquely positioned to respond to country requests and to convene organizations and individuals with common interests in scaling up and sustaining LLIN distribution”.*

## **AMP three core activities**

---

- 1) Partner coordination and advocacy related to LLIN distribution
- 2) Responding to country and partner requests for operational support with a focus on capacity building
- 3) Sharing operational guidance, documenting best practice in areas including: BCC, M&E, OR, emerging issues, and tracking LLIN deliveries globally

## **What is the next challenge for AMP?**

---

- AMP has always been our most productive and dynamic when faced with a new challenge the next “problem” to solve
- The next “problem” to solve has always revitalized AMP’s work
- There is a great deal of work to do in the roll out of other malaria commodities (RDTs)
- Under the NFM Global Fund is working on the issue of how malaria grants can fund iCCM commodities and roll out
- Achieving integration will require additional inputs, including alternative rationale, incentives or policies that are familiar to and manageable by AMP.
