

AMP The Alliance for Malaria Prevention

Expanding the ownership and use of mosquito nets

AMP Conference call minutes: www.allianceformalariaprevention.com

13th February 2019

Dial-in number: +1-213-787-0529
USA toll-free: 888-808-6929
Access Code: 3904916

If you wish to be added to or taken off this mailing list please contact: melanie.caruso@ifrc.org

Do you have a topic / issue / country specific update to share with the AMP partnership? Send a summary of the topic you would like to discuss to: jason.peat@ifrc.org or melanie.caruso@ifrc.org and we will schedule your update at the start of an upcoming AMP conference call.

Agenda – February 13th AMP conference call

Chair : Jason Peat
Rapporteur : Melanie Caruso

- Introductions
- Review of minutes from last week's AMP conference call
- Country Updates
- Working Group Updates
- AOB

Next conference call: Wednesday, February 20th, 2019 10:00 EST, 14:00 GMT / UTC, 16:00 CET

Participants:

AMF:	
AMP participants:	Brian Lusambili, Kamel Maina, Alain Daudrumez, Miko Thomas
BASF:	Alex Heimsch
Buy a Net:	
CDC / PMI:	Anna Bowen
GHSC-PSM:	Godwin Aidenagbon. Kingsley Godson
CRS:	
Disease Control Technologies:	
Friends of RAM:	Drake Zimmerman
Global Health Partners:	
Global Fund:	
IFRC:	Marcy Erskine
Independent participants:	David Gittelman
Intelligent Insect Control:	
IPHA:	
JC Flowers Foundation:	
JHU Centre for Communications:	Andrea Brown
JSI:	
MCDI:	
Milliner Global Associates:	John Milliner

and allianceformalariaprevention@gmail.com

Nets for Life:
 NMCP Pakistan:
 PLAN Canada:
 PSI: Joe Lewinski
 Real Relief Health:
 Results in Health:
 Rotarian Malaria Partners:
 Sumitomo:
 Tana Netting:
 UNICEF:
 UN Foundation:
 USAID / PMI: Lilia Gerberg, Stefanie Evans
 VectorLink: Mary Kante
 VF:
 WHO: Jan Kolaczinski
 World Vision: Gagik Karapetyan

General updates:

AMP working group updates:

Country support working group:

Chair: Marcy Erskine IFRC – marcy.erskine@ifrc.org

Current AMP TA missions :

Country	Type of technical support requested from AMP	Partner / Funding source	Mission dates
Burkina Faso	SBCC/Next Gen nets	CRSPC/PSI	February 2019
Cameroun	Implementation	PNLP	January-February 2019
Senegal	Logistics	CRSPC	January-February 2019
Mozambique	Implementation Logistics SBCC	CRSPC	February 2019

Planned AMP TA missions 2019:

Country	Type of technical support requested from AMP	Partner / Funding source	Mission dates
Nigeria	Implementation	CRS	Continuous 2019
Madagascar	Post-campaign	USAID PMI	March 2019
Mozambique	Implementation and Logistics	CRSPC	February - March 2019

Gambia	Logistics	CRSPC	TBC
Cameroun	Implementation and Logistics	NMCP	Continuous 2019
Congo Brazzaville	Implementation and Logistics	AMP	TBC 2019
Burkina Faso	Implementation, Communications and Logistics	AMP	Continuous 2019
CAR	Implementation and Logistics	World Vision	TBD 2019
Sudan	TBD	TBD	TBD 2019
South Sudan	Implementation	CRSPC	TBD 2019
Burundi	TBD	TBD	February/March 2019
Ethiopia	TBD	TBD	TBD
Guinea	Implementation	CRSPC	February 2019
Yemen	SBCC	CRSPC	TBD
Mali	Implementation and Logistics	TBD	May 2019
Chad	TBD	UNDP	TBD

Completed AMP TA support (distance and in-country) in 2019:

Country	Type of technical support requested from AMP	Partner / Funding source	Mission dates
Burkina Faso	Logistics	CRSPC	January-February 2019
CAR	Logistics	World Vision	January 2019
Malawi	Post-campaign lessons learned	USAID PMI	January-February 2019
Nigeria	Implementation	CRS	January 2019
Pakistan	Implementation Logistics	CRSPC	January 2019 January 2019
Uganda	Logistics	CRSPC	January 2019
Total # of countries supported by AMP in 2019 (in-country):		6	

Emerging issues working group:

Co-chairs: Joe Lewinski – PSI (jlewinski@psi.org) and Jessica Rockwood – IPHA (jrockwood@iphadvisors.com)

- No update

Monitoring, Operational Research, and Evaluation (MORE) working group:

Co-chairs: (Anna Bowen - CDC/PMI aqb0@cdc.gov; Godwin Aidenagbon – Chemonics

gaidenagbon@ghsc-psm.org; and Elizabeth Ivanovich UNF - eivanovich@unfoundation.org)

- Godwin Aidenagbon (Chemonics Nigeria) joined as the new co-chair of the AMP MORE working group
- Lunch meeting was held last week in Geneva – ongoing work on collating information from partners meeting
- MORE working group call to be planned sometime next week

Net mapping project working group:

Chair: John Milliner – Milliner Global Associates jemilliner@gmail.com

- Working on expansion of scope of the project based on discussions held last week in Geneva

Toolkit and Training working group:

Chair: Marcy Erskine IFRC – marcy.erskine@ifrc.org

- New tools under development in 2019 to be presented on an upcoming call
- AMP Trainings 2018 final report completed – two pager report for the partnership to be developed for dissemination

Resource Mobilization working group:

Jason Peat – IFRC Jason.peat@ifrc.org, Drake Zimmerman – Rotarians Action Group on Malaria

drakezim@gmail.com and Jessica Rockwood – IPHA jrockwood@iphadvisors.com

- Working group call will take place today after the weekly AMP call to discuss 2019 workplan

AMP ‘ACTIVE COUNTRIES’

Countries where AMP is currently providing technical assistance via in-country missions or distance support.

AMP ‘Active Countries’ updates provided on February 13th AMP call: Angola, Burkina Faso, Burundi, Cameroun, CAR, Chad, Gambia/Senegal, Guinea, Madagascar, Malawi, Mali, Nigeria, Senegal, Sierra Leone, Sudan, Uganda

Angola:

Population at risk of malaria in Angola :							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI							
Totals							

Update on February 13th AMP conference call:

- Report from the last phase of the campaign in Angola shared with the minutes of this week’s call

Benin:

Population at risk of malaria in Benin							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI							
Totals							

Ongoing issues:

- Starting to plan for 2020 mass campaign
- Discussions around quantification have already started. Will do level of adjustment on population size.

Burkina Faso:

Population at risk of malaria in Burkina Faso							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI							
Totals							

Update on February 13th AMP conference call:

- Burkina Faso is planning a National campaign for 2019, 12,174,205 nets funded by GF for universal coverage in all 70 districts of the country.
- Due to insecticide resistance in certain areas of the country, three different type of nets will be distributed: standard (9,341,340), PBO (1,299,245) and G2 (1,533,620).

- Distribution is planned in two phases: 1st phase May25-29 for standard nets, 2nd phase 12-16 July for G2 and PBO nets.
- PNLP is lead organization and face of the campaign, while PADS is PR and PSM is providing technical support and financing part of the logistics trainings.
- PNLP will be implementing a new approach for micro-planning in order to improve on some of the weaknesses of the previous (2016) campaign.
- 17 districts (of 70) have already received standard and PBO nets.
- Microplanning ongoing in the field
- Haven't finalised all the macro documents yet. Need to harmonise macro and micro logistics plans
- Trying to put more detail into the communications plan and prioritise activities that are funded and that can be rolled out on time – support ongoing under New Nets project with support from AMP.
- Cleaning of data next week
- This will be first time for BF to do real microplanning - Gap might be coming out of microplanning and can be addressed

Burundi:

Population at risk of malaria in Burundi :							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI							
Totals							

Update on February 13th AMP conference call:

- 2020 campaign planning has started and term of reference for planned TA shared by UNDP

Cameroun:

Population at risk of malaria in Cameroun :							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update

Mass distribution							
ANC							
EPI							
Totals							

Update on February 13th AMP conference call:

- Mission ongoing and weekly sitrep attached to the minutes of this week's call
- Workshops completed for microplanning for second phase of the campaign – the last one is happening now
- First workshop was to train the team from the region and district on the mass campaign, and second workshop was on microplanning.
- During the training of trainers in November, 2 staff from each region were trained to be part of the ToT. The two people from each region were supported by 3 people from central level and support from AMP consultant was provided
- Worked on maps of each health facility and worked on microplanning templates.
- Finalised microplanning from North, Extreme North and Adamawa.
- Second phase in Extreme North to be finished this week as information is being put together during final microplanning workshop.
- Preparing this week the HH registration that will happen in the first regions in Littoral, South, East and Western regions.
- HH registration teams will be trained up to Wednesday, followed by communication activities.
- HH registration activity will be conducted over 1 week + 2 weekends to allow wide reach
- Tools produced with PLAN Cameroun and finalised to be brought to district level.
- Finalising consolidation of microplanning this week
- Challenges: selection of transport partner
- Nets funded by government of Cameroun: gap is still there –government has already put forward 25% of the need. NMCP is working on how to get this budget and procure a second quantity of nets.

Central African Republic (CAR):

Population at risk of malaria in CAR :							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI							
Totals							

Update on February 13th AMP conference call:

- TA for 2019 targeting regions 1, 2 and 3 – working on putting TA in via CRSPC and GF PR/IFRC mechanism with a focus on microplanning in March and April.

- Rainy season in April - Objective to start planning in March and microplanning and distribution to happen closer to the end of the rains

Chad:

Population at risk of malaria in Chad :							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
Continuous distribution							
ANC							
EPI							
Totals							

Update on February 13th AMP conference call:

- 2020 campaign planning has started, and UNDP has reached out for initial discussions on possible support to take place this week

Congo Brazzaville:

Population at risk of malaria in Congo Brazzaville:							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI							
Totals							

Ongoing issues:

- Waiting for final mission report from December 2018 support mission
- A lot of distance support has been provided over the holidays working on communication aspects and trying to get microplanning templates done. Microplanning should take place this month, and a request for support should be coming soon

DRC:

Population at risk of malaria in DRC :							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI							
Totals							

Ongoing issues:

- Campaign is moving along
- AMF has order 3.2 million LLINs and are looking at the issue of insecticide resistance
- Schedule for distribution is currently being revised

Ethiopia:

Population at risk of malaria in Ethiopia:							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI							
Totals							

Ongoing issues:

- Planning to meet with the country team at the AMP regional training in Nairobi to go over questions still pending to prepare campaign guidelines.

Gambia/Senegal:

Population at risk of malaria in Gambia:							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI							
Totals							

Update on February 13th AMP conference call:

- AMP TA provider currently in Senegal pushing forward on logistics – sitrep attached to the minutes of this week’s call
- First round of ToT started in Senegal
- Running behind with alignment with the Gambia
- Rotary working on moving funds to the Gambia cross border distribution: starting a series of country grants from Rotary.
- Trainings are taking place and then going down to implementation level for microplanning.
- Country teams to be joined together for the coordination calls
- Mapping of transfer of nets needs to be worked out in a couple of weeks.

Ghana:

Population at risk of malaria in Ghana :							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI

---------------	--	--	--	--	--	--	--

Ongoing issues:

Western Region

- Distribution completed. 93% coverage
- Post Distribution Validation and retrieval of tablets for 10th -14th September, 2018

Central Region

- Distribution completed. 92% coverage
- Post Distribution Validation and retrieval of tablets ongoing (27th – 31st August, 2018)

Northern Region

- Distribution completed. 94% coverage
- Post Validation and retrieval of tablets completed.

Upper East

- Pre Distribution validation ongoing (27th – 31st August, 2018)
- Distribution is slated for 18th – 25th September, 2018
- The dates for Post Validation and retrieval of tablets will be confirmed soon

Brong Ahafo

- LLINs to districts ongoing (27th – 31st August, 2018)
- DPA Training scheduled for 3rd - 4th September, 2018
- Distribution is slated for 5th to 11th September, 2018
- The dates for Post Validation and retrieval of tablets will be confirmed soon

Ashanti Region

- Informative and Regional Orientation has been scheduled for 3rd and 4th September, 2018 at the Regional Health Directorate Conference Room (Kindly find detailed schedule attached)

Greater Accra

- Informative and Regional Orientation has been scheduled for 17th September, 2018. (Kindly find detailed schedule attached)

Guinea

Population at risk of malaria in Guinea :							
Required LLINs :							
LLINs imported into the country three years prior to update :

EPI							
Social Marketing							
Totals							

Update on February 13th AMP conference call:

- TA request for 2019 made to AMP to participate in the wrap up meeting and campaign lessons learned activities
- Having problems with payment of people
- AMP TA mission to go in soon – look at facilitation of payment process
- Rapid survey to be put into place and rolled out in Global Fund districts. Already being rolled out in PMI districts
- The country thought they did not have enough nets at HH registration phase, so then decided on different allocation of nets and ended up with a surplus of nets. Taking a conservative decision hurt them a bit. AMP to support on decision making on what to do with left over nets and what distribution channels to use

Malawi:

Population at risk of malaria in Malawi :							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI							
Totals							

Update on February 13th AMP conference call:

- Mission completed and weekly sitrep attached to the minutes of this week's call
- Malawi distributed 10, 957,058 LLINs at national level, covering all 29 districts from 24th September to 20th November 2018 targeting a total population of 17,931,638
- Current mission focus is on
 1. Interviews with key stakeholders to identify 2018 campaign strengths, weaknesses and challenges
 2. Review campaign documentation and reports;
 3. Facilitate Regional and national lessons learnt workshops & Reports.
- **Priorities of the TA** is to assist the PR and NMCP in implementing the lessons learned process and workshops:
- **National lessons learned workshop – Salima, February 5 and 6**
- Debriefing the National Task Force on Friday 8, 2019 – Presentation of the lessons learned workshops findings
- Wrap up meeting with PMI
- Lessons learned workshop draft report completed and sent the country
- **SOME POSITIVE ASPECTS**
 - Nets made it to the beneficiaries
 - NTF WhatsApp group chat was successful
 - Involvement of partners in DTF helped implementation and DTFs overall effective
 - Tools were available
 - Door to door registration reached out to a larger population
 - Media engagement took place on time for launch and distribution
 - Use of community radio was effective

- High community participation in activities indicates that public was informed of the campaign
- Successful pilot use of technology for HHR and distribution.
- WV piloted use of Last Mile Mobile Solution (LMMS) an electronic mode for data collection in one district. The system used android phones with open source software. The LMMS was used alongside paper-based registers. The expected outcome was to ensure reaching 100% of the registered beneficiaries to receive their nets. The district distributed 81,198 LLINs to 30,331 households with 149,370 beneficiaries. The system advantaged compared to the paper based info collection:
 - full beneficiary HH information including photo for Identification
 - automated ratio calculation - reduced errors
 - Easier data management and tracking of entitlements
 - Reduced beneficiary tracking and waiting time at distribution site
 - Automated tracking in real time of progress in registration and distribution which makes reconciliations easier without risk of calculation errors
- **SOME ISSUES HIGHLIGHTED AT LESSONS LEARNED WORKSHOPS:**
- Issuing vouchers was not clearly understood by HSAs. Applied inconsistently, it added to confusion and misuse;
- Delayed tools procurement and delivery contributed to the campaign delay.;
- Use of outdated data affected micro plan & budget and had lasting ramifications throughout the campaign;
- Supervision during HHR was weak, as evidenced by inflated HHR results;
- One supervisor for 5 HF led to inadequate supervision;
- The micro planning template was not clearly understood and mapping exercise did not yield useful information;
- Use of one Logistic Service Provider lead to underperformance on logistics issues;
- Some warehouses were not inspected and substandard
- **SOME CHALLENGES**
- Too many tools affected capturing of data.
- Use of head of Dpt at DTF affected functionality of the DTF (they are not available)
- Security lapses during distributions
- Miscalculations by HSAs- led to some sites receiving less nets than expected
- Late delivery of nets to distribution sites
- Inadequate nbr of distribution days. Districts view that one day distribution is not adequate.
- Delayed in payments. Mobile money system is not user friendly in rural areas:
 - mobile money agents are only located at busy trading centres;
 - the few available agents did not have sufficient funds to allow cashing out;
 - some volunteers did not have mobile phones;
 - delayed submission of participants' particulars to World Vision by the districts
 - differences in participants details vs provided/submitted originally
- SBCC budget was removed so communication/publicity was not adequate in all districts.
- **MAJOR LESSONS LEARNED**
- Engagement of a broad range of partners is crucial to the success of the campaign.
- Finalization of transport plans using HHR data at least 4 weeks prior to distribution is key.
- Important to have supervisors carry detailed Districts Transport plan to refer to
- Better to start with a fewer districts within the phase for efficiency of distribution
- High volume Districts need to be the very last within a phase to start distribution
- Big trucks (e.g 30 tons and above) must be used minimally to avoid unnecessary delays
- HSAs must be involved in all planning as the custodians of data at ground level
- Supportive Supervision at all levels (National, District and Health Facility level) is key
- Communication flow from warehouse to receiving end is paramount in minimizing delivery delays
- Daily LLINs reconciliation be adhered to minimize missing LLINs and facilitate reverse logistics
- The longer the LLINs stay out in the temporary storages the higher the risk of missing
- Orientations must target personnel readily available to carry out the actual implementation
- Constant engagement of the Logistics Service Provider is of paramount to address, correct and improve performance of service delivery
- A comprehensive verification of HHR data is important to have precise figures of HHs

- NTF and DTF composition must get committed and available people to be part of Task Forces to avoid absence of supervisors at critical campaign roadmap times

Mali:

Population at risk of malaria in Mali :							
Required LLINs :

Update on February 13th AMP conference call:

- Mission ongoing and weekly sitrep attached to the minutes of this week's call

- The Mozambique NMCP and World Vision (PR) are working towards a mass ITN distribution campaign covering all parts of the country except Maputo Province and Maputo Cidade in 2019 / 2020.
- Based on the quantification for procurement, approximately 14M nets will be distributed in the country.
- The ITNs to be procured and distributed include standard LLINs, PBOs and IG2. For the IG2, the quantity available is insufficient to cover an entire province, so the targeted province will receive standard and IG2 nets in 50% of districts each.
- Mozambique will hold national elections in the third quarter of 2019, which is a factor in the provincial campaign roll out. Two provinces are targeted for campaigns in 2019: Nampula and Cabo Delgado, planned for a total of approximately 5,346,710 nets to 9,623,999 persons. However, there are concerns regarding the security situation in Cabo Delgado which may create challenges for implementation of the campaign as per the planning – to be determined by the MOH / NMCP. The distribution in Nampula is scheduled for May – June 2019.
- Following the Nampula distribution, the country will roll out distribution in waves in 2020 for the remaining targeted provinces.
- **Technical/implementation TA:** Review the overall strategy from coordination through to post-distribution, with a particular focus on bringing up to date issues that have changed since the previous campaign and addressing challenges identified in the previous campaign related to coordination, planning (macro/micro), data collection, supervision, monitoring, etc. Support preparation for and roll out of the TOT for Nampula and Cabo Delgado provincial focal points.
- **Logistics TA:** Based on lessons learned from the previous (2016/2017) campaign, review and update documents related to the logistics and microplanning aspects of the upcoming campaign and support the roll-out of the central ToT for the provinces of Nampula and Cabo Delgado.
- **SBCC TA:** Update of the documents related to SBCC aspects of ITNs campaign planning and implementation and roll out of the TOT sessions for Nampula and Cabo Delgado scheduled to distribute in 2019.
- Working session with World Vision to revise agenda for ToT (to be held 21 -23 February)
- Meeting with World Vision and NMCP to validate revised agenda for ToT.
- Working session with SBCC sub-committee to review IECC materials.
- Revised agenda for ToT to identify successes and identify ways to address challenges of previous campaign
- Documents and training materials for ToT identified (ongoing)
- General elections in October
- Cabo Delgado has safety and security issues that need to be accounted for in planning
- ITNs will be distributed with their packaging, leading to SBCC considerations in relation to waste management at HH level
- SBCC strategy will need to be developed to take into account multi-product campaign and any risks associated with potential rumours
- Coordination will need to be very strong in advance of the elections to minimize politicization of the ITNs
- Risk assessment and mitigation planning will be important

Nigeria:

Population at risk of malaria in Nigeria :							
Required LLINs :

Update on February 13th AMP conference call:

- Update the National Implementation Guidelines for LLIN distribution campaigns is ongoing. ANC/EPI modules
- Microplanning in Plateau and Cross River State
- Concentrating on procurement of materials and tools
- Continue to have bi-monthly LLIN coordination meetings
- Conducting microplanning in Kano in May
- PBO nets expected in June will arrive in June for Ebonyi State
- Request by CRS to AMP to support the country in strengthening LLIN Campaign microplanning, with a view to improving quality of LLIN Campaigns in the country. In addition, the Campaign implementation in Yobe State presents an opportunity for learning and operationalizing the COE document. Therefore, we will be needing in-country support for these 2 missions:
 - Provide technical assistance during the microplanning activity in Taraba State.
 - Provide technical assistance for the implementation of LLIN mass distribution campaign in Yobe state (COE implementation)
- The following support is requested for the LLIN Campaign in Taraba State:
 - Provide technical assistance during the Microplanning activity in Taraba State to ensure alignment with the updated microplanning guidance.
 - Support in strengthening SBCC aspect of the microplanning.
 - Provide technical assistance for the implementation of LLIN mass distribution campaign in Yobe state which is a complex operating environment.

Ongoing issues:

- Directorate of Malaria Control (DMC), Pakistan has been distributing LLINs to achieve universal coverage in highest endemic districts (API>10) through the support of The Global Fund.
- Since 2015, Pakistan has been distributing nets through periodic mass campaigns, while there has been simultaneous continuous distribution of LLINs through antenatal services (ANC), which aims to promote antenatal visits in targeted districts. As per Pakistan's National Malaria Strategy 2015-2020, DMC seeks to increase access to LLINs 100% of rural population living in high-risk malaria areas. In 2019, The Global Fund NFR (Malaria) Grant, Pakistan, will distribute approximately 3,844,678 LLINs in 21 high malaria burden districts through a mass LLINs distribution Campaign.
- Drafting of training manuals for HH registration and distribution ongoing

Senegal / The Gambia:

Population at risk of malaria in Senegal :							
Required LLINs :							
LLINs imported into the country three years prior to update :

Ongoing issues:

- School distribution ongoing - 10 regions completed - Mwanza and Mara are the latest.
- Ongoing - Kigoma is about 50% complete and Simiyu is about 70% complete
- To be completed this week (10/13)
- Remaining regions are Tabora and Katavi
- Nets just arrived for these two - 11 containers and 5 more to be received from the port.
- Expect to start distribution on October 22nd for these two regions. Will have completed all of SNP by end of November.
- Some PBO nets are meant for Health facilities and School net programs for one DC of Muleba, On arrival they will be received and stored in the Kegera Warehouse, then distribution will take place; the implication is the delay of SNP in the given Council and possible stock out at the health facilities that expect to receive them.
- This will be the first routine distribution of PBOs that we are aware of. It would be interesting to evaluate if trickling PBOs into communities is a useful strategy or if it works better to try to attain higher PBO net coverage levels quickly, even if that means fewer areas receive them.

Uganda:

Population at risk of malaria in Uganda :							
Required LLINs :							
LLINs imported into the country three years prior to update :

Ongoing issues:

- J.C. Flowers Foundation has purchased 26,649 LLINs for distribution in Northern Namibia, in their program areas. They have been hearing for over a year now that most households in the communities they work in lack nets.
- Working closely with the Ministry on this. The nets are currently held up in Walvis Bay but we expect them to arrive at their destination soon and be distributed by field teams by end of August.

ASIA PACIFIC / AMERICAS

Asia Pacific/Americas country updates provided on February 13th AMP call: None

Haiti:

Population at risk of malaria in Haiti :							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
