

AMP The Alliance for Malaria Prevention

Expanding the ownership and use of mosquito nets

AMP Conference call minutes: www.allianceformalariaprevention.com

15th March 2017

Dial-in number: +1-213-787-0529
USA toll-free: 888-808-6929
Access Code: 3904916

If you wish to be added to or taken off of this mailing list please contact: melanie.caruso@ifrc.org

Do you have a topic / issue / country specific update to share with the AMP partnership? Send a summary of the topic you would like to discuss to: jason.peat@ifrc.org or melanie.caruso@ifrc.org and we will schedule your update at the start of an upcoming AMP conference call.

Agenda – March 15th AMP conference call

Chair : Jason Peat
Rapporteur : Melanie Caruso

- Introductions
- Review of minutes from last week's AMP conference call
- Country Updates
- Working Group Updates
- AOB

Next conference call: Wednesday, 22nd March 2017 10:00 EST, 14:00 GMT / UTC, 16:00 CET

Participants:

AMF:	Peter Sheratt
AMP participants :	Doug Mole, Melanie Caruso
BASF:	
Buy a Net:	
CDC / PMI:	Mark Maire, David Gittelman, Chantelle (Angola)
CRS:	
Disease Control Technologies:	
IFRC:	Marcy Erskine
Independent participants:	Kevin Starace
Intelligent Insect Control:	
IPHA:	
JC Flowers Foundation:	Danielle Givens
JHU Centre for Communications:	Sean Blaufuss, Hunter Harig
JSI:	
MCDI:	Maria
Milliner Global Associates:	John Milliner
Nets for Life:	
PSI:	Charlotte Eddis
Real Relief Health:	Annette Braae

and allianceformalariaprevention@gmail.com

Rotarians Action Group on Malaria: Drake Zimmerman
 Sumitomo:
 Tana Netting: Martina
 UNICEF:
 UN Foundation:
 USAID / PMI:
 VF: Aurelie Delbaere
 WHO:
 World Vision: Gagik Karapetyan

General updates:

AMP LLIN in Complex Operating Environments

- LLIN in COE draft has been sent out for review to the working group
- If you wish to be added to the review list of this document, please get in touch with marcy.erskine@gmail.com to be added to the mailing list.

AMP working group updates:

Country support working group:

Chair: Marcy Erskine IFRC – marcy.erskine@ifrc.org

Current AMP TA missions :

Country	Type of technical support requested from AMP	Partner / Funding source	Mission dates
Benin	Logistics	AMP	March 2017
Burundi	Logistics	ALMA	March 2017

Planned AMP TA missions 2017 :

Country	Type of technical support requested from AMP	Partner / Funding source	Mission dates
DRC	Implementation and Logistics	PSI	TBD 2017
Benin	Implementation, Communications and Logistics	AMP	Continuous 2017
Burundi	Implementation and Logistics	GF	Continuous 2017
CAR	Logistics and Communication	IFRC	Q1 2017
Guinea Bissau	Implementation, Logistics and Communication	UNDP	Q1/Q2 2017
Nigeria	Implementation	AMP/IFRC	Continuous 2017
Mauritania	Implementation and Logistics	GF	Continuous 2017
Mozambique	Implementation and Logistics	AMP	Continuous 2017
Liberia	Implementation, Logistics and Communication	AMP	Continuous 2017

Pakistan	CMA	GF	TBD
Togo	Implementation and Logistics	GF	TBD

Completed AMP TA support (distance and in-country) in 2017:

Country	Type of technical support requested from AMP	Partner / Funding source	Mission dates
DRC	Implementation Implementation	PSI PSI	February 2017 March 2017
Guinea Bissau	Implementation	AMP/UNDP	January 2017
Mozambique	Logistics	AMP	February 2017
Nigeria	Implementation	AMP	February 2017
Sierra Leone	Implementation (x2) and Logistics Logistics	AMP NMCP	January 2017 March 2017
Tanzania	CMA	VectorWorks	January 2017
Togo	Logistics	AMP	February 2017
Total # of countries supported by AMP in 2017 (in-country):		7	

Emerging issues working group:

Co-chairs: Megan Fotheringham – USAID/PMI mfotheringham@usaid.gov ; Caroline Desrousseaux VF - cde@vestergaard.com)

- No update

Monitoring, Operational Research, and Evaluation (MORE) working group:

Co-chairs: (David Gittelman - CDC/PMI dmg1@cdc.gov and Elizabeth Ivanovich UNF - eivanovich@unfoundation.org ; Mame Birame – USAID/PMI Senegal mbdiouf@usaid.gov; and Sylvester Maleghemi – WHO, Nigeria tojumaleghemi@yahoo.co.uk)

- Continuing work on the pieces of the M&E toolkit chapter that need revising
- Call next week to regroup on the revision process with a final draft due in April for the MORE group to review

Net mapping project working group:

Chair: John Milliner – Milliner Global Associates jemilliner@gmail.com

- The AMP Net Mapping Project's New Net Mapping program is now fully functioning on the AMP website and can be accessed through the following link [:http://netmappingproject.allianceformalariaprevention.com/](http://netmappingproject.allianceformalariaprevention.com/)
- Please take a moment to visit the AMP website and address any comments and/or suggestions to the Net Mapping Project chair, John Milliner. The AMP Net Mapping Project will continually be updating the program with new country distribution data as they become available. If you have any country distribution to share with John, please feel free to do so.

AMP 'ACTIVE COUNTRIES'

Countries where AMP is currently providing technical assistance via in-country missions or distance support.

AMP 'Active Countries' updates provided on March 15th AMP call: Angola, Benin, Burundi, CAR, Chad, DRC, Guinea Bissau, Liberia, Mozambique, Nigeria, Sierra Leone, Togo

Angola:

Population at risk of malaria in Angola :				19,600,000 (World Malaria Report, 2012)			
Required LLINs :				10,888,888			
LLINs imported into the country three years prior to update :				4,850,646 (AMP Net Mapping Project)			
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	Phased approach by province – 1LLIN/2 people - 2013	11,700,000	7,484,312	3,669,125		Implementation , Logistics	03.04.13
ANC							
EPI							
Totals	N/A	11,700,000	7,484,312	3,669,125			N/A

Update on March 15th AMP conference call:

- USAID PMI is providing 2.1 million nets upwards from previous 1.4 million - arriving week of April 9th.
- GF committed 50% of nets for campaign (half of routine nets)

Ongoing issues:

- In May of 2017, Angola will implement its first simultaneously implemented national mass LLIN distribution campaign. The LLIN distribution campaign is part of a larger effort to increase net ownership and usage that includes strategies such as social and behavioural communication change and continuous net distributions. Local and international consultants supported by VectorWorks to assist the Angolan National Malaria Control Program (NMCP) in the planning, implementation and evaluation of the campaign.
- Net arrival: Exact dates to be confirmed but past experience indicate delays are likely but PSI approach is to go ahead with activities including registration and be ready for distribution by the week of May 22 or 29. We advised that we could not start on May 1.
- Personnel: National distribution manager hired as of March 1, on long term contract, led activity in past 3 provinces for PSI. Provincial team leaders selected as of yesterday March 7 and will start 2-week training on Monday next week

Benin:

Population at risk of malaria in Benin				10,328,934 (2014 population)			
Required LLINs :				5,738,297			
LLINs imported into the country three years prior to update :				4,845,882 (AMP Net Mapping Project)			
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass	National	5,738,297	6,050,272	0		Logistics	16.07.14

distribution	<i>universal coverage replacement campaign</i>		(GF 5.245.272, USAID 280.000)			<i>and longer term coordination</i>	
ANC							
EPI							
Totals	N/A	<i>5,738,297</i>	<i>6,050,272</i>	0			N/A

Update on March 15th AMP conference call:

- Benin weekly sitrep attached
- AMP TA provider is currently in country
- Surge support on logistics AMP TA will go in at the end of this week
- Finalising the macro planning documents
- Still in process of discussion on Atacora district being done separately but seems to be approved now
- Good to move ahead now with 2 phased distribution, first phase in July and second phase in October.
- First nets arrive early April
- Long storage period for nets for the October distribution. Idea is to decentralise these storage points to distribution point level. Need to put in place strong SOPs and regular monitoring of storage points to avoid leakages

Burundi:

Population at risk of malaria in Burundi :		<i>6,690,000 (World Malaria Report, 2012)</i>					
Required LLINs :		<i>3,716,667</i>					
LLINs imported into the country three years prior to update :		<i>4,433,813 (AMP Net Mapping Project)</i>					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	UC 1.8 ratio Feb/March 2014	5,165,200	5,158,410	6,790		Implementation , Logistics	03.04.13
ANC							
EPI							
Totals	N/A	5,165,200	5,158,410	6,790			N/A

Update on March 15th AMP conference call:

- AMP TA provider is under contract with ALMA to provide country support to Burundi over the next 2 weeks
- National campaign originally planned for June 2017 has been pushed back to late July – 6,471,692 LLINs were ordered mid-October 2016 and delivery expected in all 18 provinces between April and mid-June 2017.
- Declaration by the Minister of Health of malaria epidemic in northern provinces may result in re-scheduling of deliveries to the affected area. Discussions will be held in the next few days with NMCP and CARITAS regarding the possibility to distribute as early as possible (ahead of the rest of the country) in these provinces.
- Campaign budget still not finalized as of mid-March. Latest review which took place on 13th and 14th still pending GF approval.
- No specific up-date available on security context in Burundi since last AMP mission in November 2016. NMCP and CARITAS seemingly unwilling to share any concerns in that respect.
- The priorities of the current mission are:

- Obtain latest adjustments to the campaign budget (made on 13th and 14th March) in order to align district budgets in the micro-planning template, ahead of ToT on Wednesday March 15th.
- Conduct central level ToT for micro-planning (3 days).
- Conduct central level logistics training (1 day).
- Arrived in Burundi on 12th March late PM.
- Meeting with NMCP and Caritas to review and finalize micro-planning ToT agenda, list of participants and training presentations.
- Review and align all budget assumptions and unit costs between latest version of campaign budget and district budgets included in the micro-planning template.
- Micro-planning ToT on 15th to 17th March.
- Logistics training on Saturday 18th.

Central African Republic (CAR):

Population at risk of malaria in CAR :		4,490,000 (World Malaria Report, 2012)					
Required LLINs :		2,494,445					
LLINs imported into the country three years prior to update :		162,870 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	2014 phase 2 rolling distribution according to security situation	2.2 million	2.2 million GF R8 phase 2	0		Micro planning	30.04.2014
ANC							
EPI							
Totals	N/A	2.2 million	2.2 million	0			N/A

Update on March 15th AMP conference call:

- AMP TA provider will travel to Bangui, via Nairobi, on 19th March. CAR mission week of 20th to 25th March.
- Finalising call for tenders
- Finalising macro plans next week
- Micro planning in April
- Areas without 100% access need to be considered in strategy

Chad:

Population at risk of malaria in Tchad :		11,410,000 (World Malaria Report, 2012)					
Required LLINs :		6,338,889					
LLINs imported into the country three years prior to update :		8,577,547 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution	# LLINs available per	LLIN gap per distribution	Budget gap per distribution	Technical assistance requested	Date of most recent

		channel	distribution channel	channel	channel	with date per distribution channel	update

Continuous distribution	2013 routine distribution only		762,941				
ANC							
EPI							
Totals	N/A	8,177,640	7,148,020	1,792,561			N/A

Update on March 15th AMP conference call:

- Technical support to UNDP/PALAT/NMCP Chad in coordination of the 2017 universal coverage LLIN distribution campaign, carried out in 12 regions is ongoing funded by UNDP
- The Chad Universal Coverage LLIN distribution campaign started in January 2017 for an estimated population of 9 428 950 living in 12 of the country's 23 regions. The national population is estimated at 14 650 165 in 2017.
- 6,582,600 LLINs (including a buffer stock of 1 million) LLINs were procured and planned to be distributed to 1 571 492 households in 63 of the country's 105 health districts through 890 of 1 278 health centres in Chad. The buffer is to compensate for a 19 % shortage based on population projection and real household registration encountered in 2011 and 2014 past campaigns.
- As of this date 5,077,700 (77%) LLINs arrived in country. The remaining LLINs are planned to in before the rain and on time for the last phase distribution.
- UNICEF oversees international procurement.
- WFP manage LLINs supply chain (warehousing and transportation) from Log base warehouses to District Health Centres and DPs. Also, collect packaging after distribution.
- WHO/INSEED (Nat'l Institute of statistics) independent monitors of HHR
- The LLINs delivery and overall campaign implementation have been planned by stages. The whole campaign in the 12 regions is planned to be completed in June 2017, before the start of the heavy rains in the different regions. The LLINs are warehoused in four main logistic base warehouses as they arrive in country via Port of Douala to: **Moundou** for southern regions, **Bongor** for central regions, **Ndjamena** for northern regions and **Mongo** for the central south west regions.
- Coordination meetings with NMCP and partners as well as the Technical Coordination Committee to review/approve schedule and chronograms, resolve issues and inform higher level ministry about campaign implementation and policy decisions.
- Project documents, action plans, microplan, data and schedule review.
- First phase/Mandul and Moyen Chari distribution has been delayed (as in all other regions) but now complete.
- 40% of the buffer stock has already been distributed in first region.
- The exhaustion of the buffer stock forced:
 - o a recalculation among the remaining region and,
 - o a decision to limit to 3 LLINS per HH.
- Due to several administrative reasons, the monitoring of the registration in the second region did not take place.
- The first region registration monitoring highlighted:
 - o Lack of sensitization of HHs about use of LLINs
 - o Difficulties to be precise about the size of HH
 - o Quality problems with collected data, most important: forms filling, coherence between the voucher and forms, same voucher number to different families.
 - o Quality and quantity supervision problems.

- The Monitors suggest to:
 - o Better sensitize HHs on malaria and use of LLINs,
 - o Supervisors should conduct rigorous daily control particularly the first days of registration,
 - o Improve tools training, and
 - o Supervisors must work closely with registrars in daily verifying the forms and vouchers and in correcting mistakes before sending the information.
- Due to late arrival (in June) of LLINS for Sila, the difficult access to that region and end of contract in June with WFP, it has been decided to leave the 13th region, Sila, for distribution in October-November 2017, after the rains.

DRC:

Population at risk of malaria in DRC :				67,730,000 (World Malaria Report, 2012)			
Required LLINs :				37,627,777			
LLINs imported into the country three years prior to update :				30,803,765 (AMP Net Mapping Project)

ANC							
EPI							
Totals	N/A	35,000,000	19,094,251	13,445,599			N/A

Update on March 15th AMP conference call:

- AMP TA provider has travelled to DRC on a PSI contract to provide technical support to the campaign
- Yves Cyaka was in Kinshasa supporting NMCP to review the campaign guidelines and support micro planning preparations
- AMP had a call with Gates Foundation, PSI, and GF to look at using spatial and satellite imagery to improve population estimates. Focus is on sleeping sickness as DRC is the worst affected country. Biggest issue was getting updated maps for the planning – satellite imagery is now done for 3 metres above ground – every community is extracted from this data. They compared this to government maps that do not show population changes – sending teams out now to do data collection and do random sample to pull out data – AMP will organise for these partners to get onto a call and present this to the wider AMP partnership.

Ghana:

Population at risk of malaria in Ghana :				25,000,000 (World Malaria Report, 2012)			
Required LLINs :				13,888,888			
LLINs imported into the country three years prior to update :				15,780,153 (AMP Net Mapping Project)			
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date	Date of most recent update

			channel			per distribution channel	
Mass distribution	<i>Door-to-door stand alone hang up campaigns completed in 2012</i>	<i>13 million</i>		<i>0</i>			<i>03.04.13</i>
ANC							
EPI							
Totals	N/A	13 million		0			N/A

Ongoing issues:

- LLIN distribution has been completed in Northern Ghana and Greater Accra
- The Upper West Region of the country has still not been covered.
- AMF is supporting a 2.7 million net distribution which is ongoing in Ghana
- First part completed
- Next 2 phases to be completed in July in Upper West and Greater Accra regions
- Working well with partner ERD
- NMCP had a tough period last year and now things are up and running again and no delays are foreseen

Guinea Bissau:

Population at risk of malaria in Equatorial Guinea :							
Required LLINs :							
LLINs imported into the country three years prior to update :							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update

Update on March 15th AMP conference call:

- The national coordinator & logistician joined today
- The 8 admin assistants will start as of tomorrow
- The international communications TA is scheduled to arrive on Friday
- The national communications TA has been readvertised and UNDP plan to recruit early next week.
- Logistic training at central level is very soon (20-21 March).

Ongoing issues:

- UNDP (PR) is covering TA costs
- After quantification for a universal coverage campaign (population/1,8) based on giving 1 net per 2 people, a purchase of 1,112,858 LLINs was processed and the nets have arrived in country. They are in

secured storage awaiting shipment from Bissau to regions, health areas and eventually Distribution Points.

- Bissau 2017 campaign documents suggested a distribution end of April before the rainy season, and the national cashew nut harvest which will overload the country's transport capacity.
- Past campaigns have shown a 19 % difference (2011 8%, and 2014 %) in the population projection from the 2009 census and household registration figures.
- The PR in Guinea Bissau had originally scheduled the distribution for end of April however; lead time for printing of coupons necessary for household registration has caused the distribution to be re-programmed for the last week of May.

Liberia:

Population at risk of malaria in Liberia :				4,130,000 (World Malaria Report, 2012)			
Required LLINs :				2,294,444			
LLINs imported into the country three years prior to update :				2,896,136 (AMP Net Mapping Project)			
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	Planned country wide mass distribution (last quarter of 2014)	2,195,796	1,159,089 GF 289,280 surplus from routine LLINs	169,726		Logistics and Implementation TA	09.10.13
ANC			577,700 USAID-PMI				
EPI							
Totals	N/A	2,195,796	2,026,069	169,726			N/A

Update on March 15th AMP conference call:

- A call between AMP and the country team took place this week to get an understanding of where things are at for planning of the 2018 campaign
- Liberia has its MIS happening now
- Concept note deadlines to meet now
- Campaign: rainy seasons shifting and getting heavy rains in March
- Jan/Feb 2018 scheduled for the mass campaign
- Want to do all planning in advance of elections in October and then take a break until the end of elections before going ahead with campaign implementation in Q1 2018
- Census results won't be available in time for the campaign
- Amp TA should start in country in April - funds for AMP TA are available from USAID PMI

Mauritania:

Population at risk of malaria in Mauritania:
Required LLINs :
LLINs imported into the country three years prior to update :

Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI

Ongoing issues:

- Some delays due to a freeze on policy regarding per diems
- Meeting of the country team at the AMP partners meeting supported the ironing out of these issues.
- Also went through steps achieved towards the campaign planning and what are the challenges to be addressed.
- NMCP are working on the solution to this per diem issue
- Work to commence on micro planning exercises going forward
- NMCP worked on review and update of timelines and planning the microplanning for the next 2 weeks.
- AMP consultant will be in country as of 15th March to support microplanning
- Currently supporting at a distance.

Mozambique:

Population at risk of malaria in Mozambique:				25,800,000 (World Malaria Report, 2014)			
Required LLINs :				14,333,333			
LLINs imported into the country three years prior to update :				11,784,524 (AMP Net Mapping Project)

Ongoing issues:

- AMP is working on protocol for CMA in Pakistan
- ToR for upcoming Commodity Management Assessment was revised by the OIG
- AMP TA provider has made initial draft for the protocol
- AMP had a call with Pakistan Global Fund country team to discuss what needs to be done on CMA exercise.
- Bringing on a consultant specific to CMA to focus on countries considering this type of support.
- Currently conducting LLIN distribution in some areas from March to June
- More than 3.08 million nets will be distributed in 2016 – finalising the plan now.

Senegal:

Population at risk of malaria in Senegal : <i>(World Malaria Report, 2012)</i>							
Required LLINs :							
LLINs imported into the country three years prior to update : <i>(AMP Net Mapping Project)</i>							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update

ANC							
EPI							
Totals							

Ongoing issues:

- Local consultant in country - Moussa NDour: 1st February-30th September 2016
- Distribution in phase 2 is underway
- About half the districts in each region are complete as of Monday
- For phase 3 the coordination committee met on Friday and spoke of recommendations from last AMP mission. They are going ahead with training activities for phase 3 in regions
- Timeline for phase 3 should be revised to avoid delays in activities and overlapping of certain activities and to apply lessons learned from phase 1 and 2 around HH registration.

Sierra Leone:

Population at risk of malaria in Sierra Leone :		6,000,000 (World Malaria Report, 2012)					
Required LLINs :		3,333,334					
LLINs imported into the country three years prior to update :		4,195,850 (AMP Net Mapping Project)

ANC							
EPI							
Totals	N/A	4.18 million					N/A

Update on March 15th AMP conference call:

- Sitrep attached to the minutes of this week’s call
- Sierra Leone will be conducting an integrated 2017 campaign tied to the biannual mother-child health weeks. The interventions, vitamin A and albendazole targeting children under five years of age, will be integrated with the universal coverage LLIN distribution. The strategy for LLINs is 1 net for 2 people, with a maximum of 3 nets per household.
- AMP logistics TA support for this mission focused on two main elements:
 - Prepare for and support NMCP team to deliver logistics training workshop in Bo Town Feb 28 – Mar 1, 2017; and
 - Prepare for and support NMCP in micro planning data validation, scheduled for Mar 6-10, 2017.
- NMCP convened a logistics sub-committee (LSC) meeting on 10 March 2017 to detail, review and update the LLIN Macro plans for LLIN movement with UNICEF and Scanlog/OBT agents in-country.
- After discussions held on March 9, 2017 with Dr. Smith and the NMCP team and the above LSC meeting, one major adjustment was to eliminate the 10% LLIN holdback for certain areas.
- Due to population figures being challenging for WA, planned 10% holdback quantities will still be maintained for LLINs designated for WA as a result of the large variance in population figures.
- UNICEF will deliver 100% of their LLINs with no “holdback” to their designated districts. NMCP and LSC also agreed that movement of the “holdback” of LLIN quantities that Scanlog is moving down to regional warehouses will continue due to shipments being containerized. However, once received by regional warehouses, it was decided that these nets should be moved swiftly out of the regional warehouses and delivered to DMS locations, as per the 10% holdback amounts.
- During this week, the weekly shipping status reports showed the possibility of a delay of the last few shipments. With this information, NMCP and the LSC held discussions to consider the campaign implications and decide on how to handle LLIN shipments that may be delayed. The confirmed campaign launch date of May 18, 2017 may be too tight to meet delivery timings to 2 to 3 districts. It was decided to explore whether pushing the launch date to June 1st, 2017 was possible. It was recognized that this point is urgent and needs resolution as soon as possible.
- As well, NMCP LSC decided to develop delivery details for “drop off” points for UNICEF deliveries to their predetermined allocated districts. NMCP committed to providing these details as soon as possible.
- The data validation process began on Monday March 6th with two-days for central staff to correlate the data collected. Due to a national holiday on March 8th, this week’s microplanning session was re-arranged to March 9 – 11, (as TA mission dates were set, TA only attended two of the three planned days).
- The schedule for this week was established with the arrival of DMO, DHMT teams and Regional Councillors for March 9, 2017. This 3-day final portion of the validation data process involved final discussions, cleansing of all district microplanning data, and having the details adjusted and confirmed

for all districts. This MoHS/NMCP workshop was attended by 150 participants from all 14 districts within Sierra Leone.

- An AMP TA support debrief was conducted with the Programme Manager, Dr. Smith, and his team on March 10, 2017 in Freetown to discuss recommendations and suggested next steps. AMP logistics TA support departed Freetown on March 11, 2017.

Tanzania:

ANC							
EPI							
Totals							

Ongoing issues:

- During the course of 2016, Vectorworks has implemented, in collaboration with Tanzania’s NMCP, a school-based LLIN distribution program in 7 of the 26 regions of the country. The SNP4 program covered 5,231 schools with a total of 1,153,955 LLINs distributed.
- Vectorworks is now planning to conduct a commodity management assessment (CMA) of the SNP4 supply chain in order to document the level of accountability and transparency achieved in the management of the LLINs from point of entry to distribution to beneficiaries, specifically to:
 - o Verify that adequate tools and procedures were used for proper tracking of LLINs and control of the supply chain (receiving, warehousing, transport and distribution of the nets).
 - o Verify the existence of clear and complete “audit trails” for the nets: a series of documents (waybills, stock sheets, inventory control cards, tally sheets) recording each step in the transport, storage and distribution of the nets.
 - o Verify the proper filing and quality of supply chain tracking tools. Document the extent to which reports are complete and reliable (supported by corresponding waybills, stock sheets, inventory control cards and tally sheets).
- AMP was requested to provide TA for the development of a CMA package and training of a local firm to conduct the CMA field work and produce a report outlining detailed findings, including recommendations for improvement of the logistics systems if/where needed.
- Continued meetings last week with entities involved in the SNP4 supply chain to finalize the gathering of all information and data required for the development of the CMA tools, SoPs and CMA report format.
- Meeting last Friday with the representatives of the firm contracted to carry out the CMA in order to review all the data and information obtained thus far and to introduce the basic principles on which the CMA data collection tools will be developed
- Development of the CMA data collection tools and drafting of the CMA SoPs over the course of last weekend. Development of the tools posed some particular challenges as the SNP4 supply chain structure and management tools differ in many aspects from normal/standard setup and procedures.
- Beginning of the training (of the contracted firm) on Monday and Tuesday (today).

Togo:

Population at risk of malaria in Togo :				6,150,000 (World Malaria Report, 2012)

Update on March 15th AMP conference call:

- Final AMP TA mission report has been shared with the country team
- Waiting for TA needs to be stated by PNL

Ongoing issues:

- AMP has just completed a TA mission. During mission the budget was finalized as were HH registration documents
- There are funds in GF grant to fund TA so just need to figure out mechanism for access.
- State contribution to the operational costs for the campaign. Government has come through on that and has signed off on disbursement of funds.
- Largely on track for the moment
- Togo's last mass distribution campaign was in 2014. To sustain the gains achieved in the past, the Ministry of Health is planning a mass LLIN replacement campaign to distribute LLINs nationwide to beneficiaries in June 2017. The strategy is to provide one LLIN for every two people, rounding up in the case of an uneven number of household members.
- The Togo population is estimated at 7 531 928 derived on a projection from the 2010 census adjusted by a 2,84% annual increase. The GF has accepted adding a 14% buffer in the LLIN needs quantification exercise based on the 2014 household registration experience. Thus the result of dividing the population by 1,8 to provide 1 net for every 2 people (rounded up) and adding 14 % establishes that **4 770 250** LLINs need to be procured for the 2017 campaign.
- The Togo government and the GF have agreed to co-finance the campaign with the GF and Togo government each providing 50% of the nets. Operational costs necessary to take the LLINs from the Port of Lomé and distribute them to the targeted population are also to be shared, Togo providing 40 % of operational costs and the GF grant the remaining 60%.
- The Against Malaria Foundation (AMF) has financed the Togo government's contribution of 2 413 250 LLINs and the GF will procure 2 357 000 LLINs. Both purchases comply with Togo's request to have campaign nets delivered in bulk packaging (without individual plastic bags).
- The National Campaign Coordination Committee was created by official decree in September 2016 and campaign subcommittees have been appointed to review plans and budgets

- Aside from contributing to the review and finalising of the 4 campaign core documents in order to have activities start by January 1st, 2017
- clarification of policy and procedures related to disbursement for activities so that funding will be available when needed(January)
- development and review of a streamlined competitive bid process to identify transport providers (government normally take 6 months) to have contracts signed so that transport to districts can start by April 2017.
- Sub-committee plans and budgets will be reviewed to include in Campaign Plan of Action, activities timeline Logistics Plan of Action, and macro-budget.
- Due to lengthy government procedures, it is proposed that the transport call for tenders will be managed through a contractual agreement with UNDP TOGO.
- Launch date should be in time for opening of bids and selection of transporters in January 2017
- Meeting with GF, Ministry of Health PR, and NMCP programmed for November 23rd to review LLIN campaign preparedness
- Campaign preparation activities to start January 1st to prepare for start-up of micro-planning end of February, 2017, four months before planned distribution.

Uganda:

Population at risk of malaria in Uganda :				<i>34,550,000 (World Malaria Report, 2012)</i>			
Required LLINs :				<i>19,194,444</i>			
LLINs imported into the country three years prior to update :				<i>12,480,685 (AMP Net Mapping Project)</i>			
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	Two phases: P1 completed – May 2010-January 2011 (7,293,689 LLINs distributed) ; P2 distribution planned to start in 2013	19.64 million	11,653,054 (11,003,054 from GFATM Rd7 Phase II and 650,000 from USAID/PMI)	4 million		Implementation	03.04.13
ANC	PMI supported ANC distribution ongoing in approx. 40% of the						

	country						
EPI							
Totals	N/A	19.64 million	11,653,054	4 million			N/A

Ongoing issues:

- Timing for distribution has been moved forward
- On AMF nets, 10.6 million, there are half going out to East region and half to West region.
- January distribution coming up soon.
- Half AMF nets are PBO nets and research study still to be conducted.
- High level of political discussion makes things complex to move forward.
- Concerns about plans and timelines.
- HH registration starting November 6th but too tight as no materials are printed yet
- Evaluation plans: Liverpool School is the lead on the study. Working with them are LSHTM and main implementer is McCarey University in Kampala. Talked about possibility of scaling up current research which is based on test positivity rates. But after discussion, it was felt that prevalence would be a more accurate way forward. Similar to current study in Tanzania but at larger scale. Timeline for baseline was January but timelines have changed.
- AMF contact for interested parties: psherratt@againstmalaria.com (Peter Sheratt)
- The national mass campaign includes 10.7 million nets from AMF
- Over 5 million of those will be PBO nets
- AMF nets will go out in January next year
- Idea is to have PBO nets go out in later phases to give more time for approvals to be put in place and monitoring of effectiveness to be set up

WEST AFRICA REGIONAL NETWORK

WARN countries where update provided listed below. NB: This does not include all WARN countries.

WARN country updates provided on March 15th AMP call: None

Burkina Faso:

Population at risk of malaria in Burkina Faso		10,328,934 (2014 population)					
Required LLINs :		5,738,297					
LLINs imported into the country three years prior to update :		4,845,882 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							
ANC							
EPI							
Totals							

Ongoing issues:

- AMP provided feedback on the Burkina Faso concept note
- Distribution report received

- There were big gaps in planning in terms of quality. AMP will feedback to Global Fund to discuss with country how plans can be modified in next funding opportunity. Include lessons learned to help increase quality.

Gambia:

Population at risk of malaria in Gambia:		1,780,000 (World Malaria Report, 2012)					
Required LLINs :		988,889					
LLINs imported into the country three years prior to update :		1,181,386 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	2014 replacement campaign		746,000				30.04.14
ANC							
EPI							
Totals	N/A		746,000				N/A

Ongoing issues:

- None

Guinea

Population at risk of malaria in Guinea :		12,132,795 (PMI, 2015)					
Required LLINs :		6,949,395 (2016)					
LLINs imported into the country three years prior to update :		3,502,437 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	2016	6,949,395 (2016)		0			17.02.15
Continuous distribution	Under Round10 following mass distribution	949,391	347,000				
ANC							
EPI							
Totals	N/A	7,898,786	347,000	0			N/A

Ongoing issues:

- Last mass campaign was held in 2016
- Health facility assessment for routine distribution conducted by VW last week
- Main take aways: majority of time nets are finding a wayback into routine system, but nets are not always successfully distributed through the mass campaigns especially in an urban context

Mali:

Population at risk of malaria in Mali :				<i>15,880,000 (World Malaria Report, 2012)</i>			
Required LLINs :				<i>8,822,222</i>			
LLINs imported into the country three years prior to update :				<i>5,888,050 (AMP Net Mapping Project)</i>

Ongoing issues:

- For the 2018 mass campaign, the country is currently negotiating with the Global Fund to include it in the NFM.

CENTRAL AFRICA REGIONAL NETWORK (CARN)

CARN countries where update provided listed below. NB: This does not include all CARN countries.

CARN country updates provided on March 15th AMP call: None

Cameroun:

Population at risk of malaria in Cameroun :		22,250,000 (World Malaria Report, 2014)					
Required LLINs :		12,361,111					
LLINs imported into the country three years prior to update :		1,537,744 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution	UC March 2015	12,322,059	12,322,059 (GF)	0		Implementation and Logistics	24.03.2015
ANC							
EPI							
Totals		12,322,059	12,322,059	0			

Ongoing issues:

- Focus on pulling out lessons learnt from last campaign during upcoming AMP mission
- Not sure yet on design of strategy for next campaign
- Timelines are tight as nets arrive early January so logistics training needs to happen soon.
- With support from the Global Fund, IFRC as PR has supported distribution of more than 1 million nets in RS 1,2 and 3.
- RS 4, 5 and 6 are still to be covered. Small populations hard to reach
- Last 22'000 nets going out to region sanitaire 4 on border with Sudan/Chad
- Finalising the extension of the malaria grant for completion of mass distribution in most difficult to reach areas of the country - 2 mil bed nets for mass distribution and expansion of routine services
- Country is finalising a malaria indicator survey and data is being cleaned. Results in a month and country will provide presentation of results
- Next mass distribution will start first quarter of 2017

Equatorial Guinea:

Population at risk of malaria in Equatorial Guinea :	720,000 (World Malaria Report, 2012)
---	--------------------------------------

Required LLINs :		400,000					
LLINs imported into the country three years prior to update :		52,000 (AMP Net Mapping Project)					
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update

EPI							
Totals							

Ongoing issues:

- Completed distribution in 2 states
- Other state to be completed by end of September
- 120,000 nets looted in July, and think there may be another 500,000 at risk.
- The rest of the stocks are in a secured compound in Juba
- PSI has found 11 local partners to work with
- Malaria is the top cause of morbidity in IDPs and non-conflict affected areas (see attached WHO surveillance bulletin).
- Malaria cases in Bentiu PoC and Malakal PoC exceeded expected levels in the week. Response:
 - o Bentiu POC – PSI has completed the distribution of LLINs in the POC site. Last week also sent RDTs and ACTs to UNICEF who are on the ground to help with any response. With this, we expect the Malaria situation to be contained.
 - o Malakal POC – Due to challenges of insecurity, we were not able to deliver the LLINs by road. We are engaging constantly with the Logistics Cluster for support in Airlifting the LLINs.
- An “expedited” distribution process has been developed based on food distributions. This means that we register and issue nets immediately.

Sudan:

Population at risk of malaria in Sudan :				<i>37,970,000 (World Malaria Report, 2014)</i>			
Required LLINs :				<i>21,094,444</i>			
LLINs imported into the country three years prior to update :				<i>9,040,385 (AMP Net Mapping Project)</i>

Totals		12,632,024	11,008,294	1,323,730	5,623,055		

Ongoing issues:

- 2018 campaigns are not yet funded
- GF current grant does not integrate 2018 campaign and most current GF grants are ending end 2017.
- More TA will be needed to conclude the current grant's campaign.
- Would be useful if the Global Fund could join a call to update us on how many countries are ending grants in 2017 and how concept notes will be done for 2018. Get an update on NFM 2.
- AMP to ask Susie Nassr to join an upcoming call with an update on the above
- WHO GMP has sent 10,000 USD to NMCP to start developing and printing HH malaria protection cards following example of EPI and test them in 2 districts for replenishment purposes where people can use this card to renew LLIN ownership after the campaign last year.
- Ideas and collaboration within AMP are most welcome
- There is no funded evaluation of this project yet. The protocol is attached to the minutes of this week's call for more information.
- Contacts: Stefan Hoyer/WHO hoyers@who.int and Charlotte Eddis/PSI ceddis@psi.org

Malawi:

Population at risk of malaria in Malawi :				15,400,000 (World Malaria Report, 2012)

ANC							
EPI							
Totals	N/A						N/A

Ongoing issues:

- Need to follow up with the country after communication mission last year to see how far they have come with recommendations and plan next phase of support
- Swaziland is currently working towards elimination
- NMCP and AMP TA provider have reviewed previous communication strategic plans aimed at the community at large.
- NMCP and AMP TA provider are reviewing the acceptance of interventions
- Will work on outreach via health workers in rural health areas. Will focus on population travelling through Swaziland mainly from Mozambique
- Are looking at a plan to have malaria prevention meeting with both traders that travel to boarder countries and Mozambique population in Swaziland

- Working to enhance communication activities in high burden areas via the creation of malaria elimination committee meetings
- Looking at targeting the transport industry with IEC materials for lorry drivers.
- Messaging to travellers to take precautions when they travel to Mozambique
- Will pass messages on malaria prevention in schools, churches, mosques.
- The programme is working on the concept note for the NFM to be submitted by June 15th - the concept note is now close to final, but they are still revising the health promotion section.
- They have just finished data collection in the field for the KAP survey which they are conducting
- Just from being in the field even though analysis has not been done yet, the team have clearly observed that nets are not being used. There is low risk perception because of the low malaria disease burden in the country
- In their NSP, nets have not been included and the Global Fund (whose team is currently in-country) agree that they should not be
- However, there are nets that were procured last year which had not yet been distributed. The plan with those was to replace/replenish the old nets. Now Global Fund has given the Programme the go-ahead to distribute them
- The exercise may commence beginning of the malaria season round September or so
- These will probably be the last batch of nets
- The strategy will then be to focus on IRS, environmental management etc.
- The plan is still to promote usage as there are nets currently awaiting distribution.

Population at risk of malaria in Papua New Guinea : <i>7,011,000 (World Malaria Report, 2012)</i>							
Required LLINs : <i>3,895,000</i>							
LLINs imported into the country three years prior to update : <i>3,464,400 (AMP Net Mapping Project)</i>							
Distribution channel	Scale of distribution	# LLINs needed per distribution channel	# LLINs available per distribution channel	LLIN gap per distribution channel	Budget gap per distribution channel	Technical assistance requested with date per distribution channel	Date of most recent update
Mass distribution							03.04.13
ANC							
EPI							
Totals	N/A		365,000				N/A

Ongoing issues:

- 1.2 million nets from AMF for 2017
- 1.6 million nets from AMF for 2018
- Looking to shift to school based distributions. Would like help assessing this.
