

Geneva, 22nd of March 2024

Dear Dr Keziah,

We would like to thank you once again for the participation of representatives of the NMEP at the 2024 Alliance for Malaria Prevention (AMP) Annual Partners Meeting in February.

This year, the AMP Core Group celebrated the twentieth anniversary of the first national integrated ITN campaign in Togo and paid tribute to the three countries who took the risks and led the way towards generating the data for ITN scale up through integrated campaigns. As you know, this started with the work in Lawra district in Ghana in 2002 and was followed by scale up to four districts in Zambia before moving to a national scale in Togo.

To mark the occasion, a short video was produced that begins with highlighting these pioneering countries before continuing to highlight the significant achievements in the last 20 years that led to us reaching the three billionth ITN being delivered to malaria endemic countries in October 2023.

The AMP Core Group recognizes and congratulates the National Malaria Elimination Program of Ghana for both the early efforts to generate data to support ITN scale up and the continued innovation in ITN delivery over the past decade, including stratification of ITN distribution channels and the development of NetApp.

The AMP Core Group wishes you continued success in ensuring that malaria services reach all populations at-risk in Ghana.

Best regards,

Jason Peat
Chair of the Alliance for Malaria Prevention

Ghana
