📅 **Monday, 7 April**

⏱ **Session Title:** *Introduction Session – Programming ITN Distribution in the Context of Limited Resources*

🎤 **Moderator:** Alex Bowles

💬 **Chat Questions Managed by:** Giovanni Dusabe (AMP FP)

Link of the Zoom - [HERE](#)

Comment - Drake Zimmerman: Rotarians Against Malaria-Global has members in 106 countries, educates & engages Rotarians in Malaria control. No Rotary Action Group speaks for or obligates Rotary International or The Rotary Foundation whose cause is only Polio until it ends. RAM-Global helps innovate and organize efforts of real experts- you all!- to speed Malaria to zero. Rotarians are 1.2 million, "the Senior Voice of Civil Society" adding business talent, local connections via 35,000 local clubs. www.RAM-Global.org.

Question: Dr Hammad Habib - PAKISTAN
What may be the most important parameters to guide and decide about prioritisation of areas to be targeted for ITN mass campaigns under the SNT?

Question to GF - Harkirat Sehmi
What is the rationale to recommend PBO OR Pyriproxyfen nets, wouldn't PBO nets be more effective in areas of pyrethroid - resistance?
This is Kate replying - thanks for the question. Yes the WHO recommendations by net type are clear that in areas of pyrethroid resistance the first choice would be CFP Dual AI, followed by PBO net.

Kuda Mupfudze: Question to Kate, GF: What costs per net should countries consider when planning to implement CFP dual nets in their national strategies

📅 **Monday, 7 April**

⏱ **Session Title:** Continuation of *Programming ITN distribution in the context of limited resources*

🎤 **Moderator:** Dorothy

💬 **Chat Questions Managed by:** Steve

Dorothy -
first presentation is recorded
then for Nigeria Presentation - Mr Chukwu Okoronko, Surveillance, monitoring, evaluation and operational research), NMEP will go first and then Fatima Ali

ok

Questions for both Nigeria and Cote d'Ivoire from Giovanni:
1) What arguments resonated most with policymakers to consider miicrostratification/reproritization, and what barriers persisted?

2) What surprised you most about the outcomes of processs, and how will this inform future campaigns?

3) What role did community feedback play in refining your prioritization process?
